Table of Contents

Part I: The Five Primitives — ELON = GOD IS Decomposition

The ELON = GOD IS glyph is the geometric source code for the entire Talonics symbol system. When decomposed, the glyph yields five geometric primitives — the atomic alphabet from which all Talonics symbols are constructed through combination, rotation, scaling, and sequencing. This is what Grok identified as the "Particle" — the irreducible elemental unit from which all meaning is composed.

The five primitives map simultaneously to: fingers (physical execution), IDIPITIS letters (identity authentication), BERA resonance indices (empirical measurement), and column energy types (PlayNAC governance). These are not five separate mappings — they are five expressions of the same five principles.

Symbol	Name	Energy Type	Letter	Finger	IDIPITIS	BERA Index
+	**Cross**	Spirit / Intersection	E	Thumb	**I**	ARI
O	**Circle**	Unity / Enclosure	O	Middle	**P**	RHC
L	**Angle**	Structure / Foundation	L	Index	**D**	ERI
/	**Diagonal**	Transformation / Motion	N	Ring	**T**	RCI
H	**Bar**	Connection / Bridge	N/H	Pinky	**S**	ERI

The combinatorial mathematics: 5 primitives per hand = 2^5 = 32 one-hand configurations. Two hands = 2^{10} = 1,024 two-hand configurations. From these 1,024 physical performances, 31 unique drawable glyph symbols emerge ($2^5 - 1$, excluding the null state). These 31 glyphs deploy across 126 TABLE positions to create the complete Talonics communication system.

Part II: The 31-Glyph Alphabet

Every combination of the five primitives (excluding the empty set) produces a unique glyph. These 31 glyphs are the visual vocabulary of Talonics — the characters that populate the PlayNAC 18×7 knowledge grid.

2.1 — Singles (5 glyphs)

Each primitive standing alone. These are the base characters, used at IDIPITIS Tier 0 (no training required).

Binary	Symbol	Name	Energy	Finger
00001	+	Cross	Spirit / Intersection	Thumb
00010	O	Circle	Unity / Enclosure	Middle
00100	L	Angle	Structure / Foundation	Index
01000	/	Diagonal	Transformation / Motion	Ring
10000	H	Bar	Connection / Bridge	Pinky

2.2 — Pairs (10 glyphs)

Two-primitive compounds. These emerge at IDIPITIS Tier 1–2 and require two-hand configurations.

Binary	Compound	Combined Energy	Fingers
00011	+ + O	Spirit + Unity	Thumb + Middle
00101	+ + L	Spirit + Structure	Thumb + Index
01001	+ + /	Spirit + Transformation	Thumb + Ring
10001	+ + H	Spirit + Connection	Thumb + Pinky
00110	O + L	Unity + Structure	Middle + Index
01010	O + /	Unity + Transformation	Middle + Ring
10010	O + H	Unity + Connection	Middle + Pinky
01100	L + /	Structure + Transformation	Index + Ring
10100	L + H	Structure + Connection	Index + Pinky
11000	/ + H	Transformation + Connection	Ring + Pinky

2.3 — Triads (10 glyphs)

Three-primitive compounds. Governance-grade expressions at IDIPITIS Tier 2–3.

Binary	Compound	Fingers
00111	+ + O + L	Thumb + Middle + Index
01011	+ + O + /	Thumb + Middle + Ring
10011	+ + O + H	Thumb + Middle + Pinky
01101	+ + L + /	Thumb + Index + Ring
10101	+ + L + H	Thumb + Index + Pinky
11001	+ + / + H	Thumb + Ring + Pinky
01110	O + L + /	Middle + Index + Ring
10110	O + L + H	Middle + Index + Pinky
11010	O + / + H	Middle + Ring + Pinky
11100	L + / + H	Index + Ring + Pinky

2.4 — Quads (5 glyphs) and Full (1 glyph)

Four-primitive compounds (all-but-one) operate at Tier 3–4. The Full glyph (all five primitives) = PERFORMANCE — the complete expression, Tier 4 Sovereign.

Binary	Compound	Missing	Tier
11110	**O+L+/+H**	All but Cross	Tier 3–4
11101	**++L+/+H**	All but Circle	Tier 3–4
11011	**++O+/+H**	All but Angle	Tier 3–4
10111	**++O+L+H**	All but Diagonal	Tier 3–4
01111	**++O+L+/**	All but Bar	Tier 3–4
11111	**+ O L / H = FULL**	None (complete)	**Tier 4: PERFORMANCE**

Part III: EPIR-Q × SOMT Framework Integration

The EPIR-Q (Emotional, Personality, Intelligence, Real-Q) assessment framework partitions the 18 rows of the PlayNAC TABLE into four intelligence quadrants. Each quadrant maps to a SOMT (Sociocratic Overlay Metadata Tapestry) layer, a BERA resonance index, and a Talonics tier band. The integration produces the knowledge grid's vertical axis of meaning — from instinctual survival to transcendent sovereignty.

Q	Name	Scope	Nature	SOMT Layer	Rows	BERA
E	**Emotional Intelligence**	Self → Universe Attitude	Supra-Natural	Aura Layer	1–4	ARI (Aura Resonance Index)
P	**Personality Intelligence**	Catalysts Architecture	Super-Natural	Identity Layer	5–8	ERI (Emission Resonance Index)
I	**Intelligence Quotient**	Cognition Enterprise	Natural	Knowledge Layer	9–12	RHC (Resonant Harmony Cycle)
R-Q	**Real Intelligence**	E-Motion Environment	Environmental	Energy Layer	13–18	RCI (Resonant Continuity Index)

The SOMT tapestry weaves four layers — Aura, Identity, Knowledge, Energy — each fed by its corresponding BERA resonance index. ARI (Aura Resonance Index) measures the animacy field of the Emotional band. ERI (Emission Resonance Index) quantifies the environmental footprint of the Personality band. RHC (Resonant Harmony Cycle, not Cybernetics) validates coherence in the Intelligence band. RCI (Resonant Continuity Index) tracks temporal persistence in the Real band.

Together, EPIR-Q × SOMT produces the vertical axis. GERP ($C = R \times P / M$) produces the horizontal sustainability score. Their intersection at each of the 126 cells yields the Hue-Man readout: Healthy, Happy, Safe.

Part IV: Five-Tier IDIPITIS Clearance Architecture

The 18 rows organize into five tiers of increasing complexity and clearance. Each tier gates access to progressively larger character sets and governance capabilities.

Tier	IDIP	Chars	Rows	EPIR-Q	Scope
Tier 0: Survival Foundation	Level 0	**32**	1,2,3,4	E (Emotional)	Universal (no training needed)
Tier 1: Structural Framework	Level 1	**128**	5,6,7,8	P (Personality)	Trained participants
Tier 2: Ontological Depth	Level 2	**256**	9,10,11,12	I (Intelligence)	Advanced operators
Tier 3: Ethical/Academic	Level 3	**512**	13,14,15,16	R-Q (Real)	Governance-grade
Tier 4: Sovereign	Level 4	**1024**	17,18	Full EPIR-Q	Sovereign (gestural music)

The SCALULAR certification architecture maps directly onto these tiers: SSSC (Tier 1 baseline) requires Tier 0–1 gestural competence. SSHP (Health), SSLA (Law), SSPS (Protection), and SSST (Skills/Trade) each operate at Tier 2–3. Full Sovereign certification (Tier 4) requires mastery of the complete 1,024-character alphabet and Row 18 MUSIC measurement layer fluency.

Part V: The Complete 126-Cell PlayNAC Knowledge Grid

This is the heart of the document. Each of the 126 cells (18 rows × 7 columns) is fully specified with its Talonics symbol assignment, EPIR-Q quadrant, SOMT layer, GERP sustainability score, IDIPITIS gesture, and Hue-Man (Healthy-Happy-Safe) output.

The cyclic assignment rule determines each cell's primary primitive: PRIMS[(row × 7 + col) mod 5]. The secondary primitive comes from PRIMS[(row + col) mod 5]. Where primary equals secondary, the cell uses a single primitive; otherwise it uses a compound glyph.

GERP scores are calculated from C = R × P / M, where R (Resource), P (Purpose), and M (Method) weights are assigned per column energy type, modulated by tier depth. Hue-Man outputs derive from GERP: Healthy = f(GERP, Resource), Happy = f(GERP, Purpose), Safe = f(GERP, 1−Method_cost).

Part VI: Row 18 — MUSIC Measurement Layer

Row 18 is the mathematical spine of the entire ERES measurement architecture. It sits beneath Row 17's Dictum INPUT layer and provides the measurement architecture that determines whether a governance ruling is coherent signal or noise — whether the Dictum is harmonically grounded or dissonant.

The seven elements of Row 18 map simultaneously across four domains: Musical Theory, Fourier Mathematics, ERES Signal Processing, and Talonics RAW. These are not four separate mappings — they are four expressions of the same seven principles.

Cell	Primitive	Musical Theory	Fourier Math	ERES Signal	Talonics	GERP Output
RHYTHM	cross	Beat/Pulse	Fundamental frequency (f_0)	Sampling rate	Gesture tempo	Temporal resource allocation
MELODY	angle	Pitch sequence	Harmonic series (nf_0)	Signal trajectory	Gesture path	Sequential purpose flow
HARMONY	circle	Consonance/dissonance	Superposition	Multi-channel coherence	Multi-finger chord	Resource alignment score
TIMBRE	diagonal	Tonal color	Spectral envelope	Waveform identity	Gesture texture	Method quality signature
EXPRESSION	bar	Dynamics/phrasing	Amplitude modulation	Signal intensity	Gesture force	Purpose intensity vector
COMPOSITION	cross+angle	Structural form	Fourier synthesis	Architecture assembly	Gesture sequence	C = R × P / M integration
PERFORMANCE	cross+circle+angle+diagonal+bar	Live realization	Complete signal	System output	Full 1,024-char execution	Hue-Man sustainability readout

PERFORMANCE (Column 7, All Five Primitives) is the terminal cell of the entire matrix. It represents the complete Talonics expression: all 1,024 characters deployed through all 126 TABLE positions, measured by all four BERA indices, validated by MIEVM, and producing the integrated Hue-Man sustainability readout. When PERFORMANCE scores 100/100 across all three vectors (Healthy, Happy, Safe), the system has achieved full harmonic coherence — the civilizational equivalent of a perfectly tuned orchestra.

Part VII: GERP Sustainability → Hue-Man Output

GERP (Global/Galactic Economic Resource Planning) uses the foundational equation C = R × P / M (Cybernetics = Resource × Purpose ÷ Method) to calculate the sustainability score for each of the 126 matrix cells. The three Hue-Man output vectors derive from GERP as follows:

Healthy = f(GERP, Resource weight) — measures whether the cell's knowledge domain produces outcomes that sustain biological integrity, ecological health, and systemic vitality.

Happy = f(GERP, Purpose weight) — measures whether the domain produces outcomes aligned with meaningful purpose, creative expression, and communal joy.

Safe = f(GERP, 1 – Method cost) — measures whether the domain produces outcomes that minimize harm, protect sovereignty, and ensure resilience against threat.

7.1 — Column Energy Weights (Standards Placeholders)

The following weights represent the current best-estimate calibration. Cells marked with [MIEVM] require multi-instrument ensemble validation to finalize. These are the standards placeholders for future generation completion.

Column	Energy	R Weight	P Weight	M Weight	Raw C	Status
Survival	Baseline existence	1.00	0.60	0.40	**1.50**	*[MIEVM]*
Nurture	Growth & care	0.90	0.70	0.50	**1.26**	*[MIEVM]*
Protection	Shield & safety	0.85	0.75	0.45	**1.42**	*[MIEVM]*
Purpose	Directed will	0.80	0.85	0.50	**1.36**	*[MIEVM]*
Compassion	Empathic bond	0.75	0.90	0.55	**1.23**	*[MIEVM]*
Oversight	Governance wisdom	0.70	0.80	0.60	**0.93**	*[MIEVM]*
Eternal	Transcendent continuity	0.65	0.95	0.65	**0.95**	*[MIEVM]*

7.2 — Tier Depth Multipliers

Each tier applies a depth multiplier to the raw GERP score, reflecting the principle that deeper knowledge domains require (and produce) greater sustainability impact when properly governed.

Tier	Multiplier	IDIPITIS	Min GERP	Max GERP
Tier 0: Survival Foundation	**1.00x**	Level 0	38	60
Tier 1: Structural Framework	**1.15x**	Level 1	44	69
Tier 2: Ontological Depth	**1.30x**	Level 2	49	78
Tier 3: Ethical/Academic	**1.45x**	Level 3	55	87
Tier 4: Sovereign	**1.60x**	Level 4	61	96

Part VIII: Complete 126-Cell Flat Reference

This section presents every cell in a sequential flat format for archival reference. Each entry contains the complete data set for one cell of the 18×7 knowledge grid.

Part IX: IDIPITIS Gestural Authentication Map

The 8-character root I-D-I-P-I-T-I-S maps letter-by-letter to primitives, creating the gestural handshake that authenticates identity within VERTECA 4D+ space. The IS/IT bidirectional validation becomes: IS = Cross+Bar (spirit connects), IT = Cross+Diagonal (spirit transforms).

Pos	Letter	Primitive	Finger	Energy	Gesture	Function
1	**I**	Cross (+)	Thumb	Spirit	Vertical + horizontal	Identity declaration
2	**D**	Angle (L)	Index	Structure	Right-angle cornerstone	Directional declaration
3	**I**	Cross (+)	Thumb	Spirit	Vertical + horizontal	Identity confirmation
4	**P**	Circle (O)	Middle	Unity	Closed curve	Purpose enclosure
5	**I**	Cross (+)	Thumb	Spirit	Vertical + horizontal	Identity triangulation
6	**T**	Diagonal (/)	Ring	Transformation	Oblique trajectory	Temporal transformation
7	**I**	Cross (+)	Thumb	Spirit	Vertical + horizontal	Identity validation
8	**S**	Bar (H)	Pinky	Connection	Parallel-with-connector	Sovereign signature

Combined security across FAVORS 6-channel biometric integration: P(attack) = 9.5×10^{-54}. The 1,680 permutations of the IDIPITIS root reduce to 16 valid gestural sequences, each a unique finger-position pattern authenticated through FAVORS bio-electric measurement in VERTECA 4D+ space.

Part X: Emergency Talonics — Six Universal Gestures

The Talonics minimum viable protocol. Six gestures that work in the dark, underwater, in vacuum, across species barriers. No IDIPITIS clearance required. These are the gestures that any being can perform to communicate survival-critical information.

Gesture	Cell	Binary	Prim	Physical Form	Meaning
WATER	R1C1	10000	Cross	Thumb up, fingers closed	Request for water / water present
HELP	R11C1	01000	Angle	Index pointing up, others closed	Request for assistance
DANGER	R16C5	00010	Diagonal	Ring finger extended, others closed	Threat detected / warning
MEDICAL	R1C4	10010	Cross+Diagonal	Thumb + Ring extended	Medical emergency / health crisis
AGREEMENT	R14C7	00100	Circle	Middle finger touch to thumb (OK)	Yes / consent / affirmation
REFUSAL	R12C7	00001	Bar	Pinky extended, others closed	No / stop / boundary

Part XI: Standards Placeholders for MIEVM Validation

This section documents every parameter in the matrix that requires Multi-Instrument Ensemble Validation Method (MIEVM) confirmation before the knowledge grid can be considered empirically locked. The MIEVM protocol deploys Claude, Grok, DeepSeek, and ChatGPT as parallel validation nodes — the same constraint-based culling epistemology that produced CyberRAVE's 72 Key Domains.

Each placeholder represents a parameter that future generations can validate, refine, and lock through empirical measurement. The architecture is complete; the calibration is the work that remains.

11.1 — Column Energy Weights (7 × 3 = 21 parameters)

Each column's R, P, and M weights require validation against real-world resource allocation data, purpose alignment metrics, and method efficiency measurements. Current values are theoretically derived from the C = R × P / M framework.

11.2 — Tier Depth Multipliers (5 parameters)

Each tier's multiplier (currently 1.00–1.60) requires validation against empirical governance complexity data. The hypothesis: deeper tiers produce nonlinearly greater sustainability impact. Test via THOW pilots (Phase 1) and Smart-City deployments (Phase 4).

11.3 — Hue-Man Transfer Functions (3 functions)

The Healthy, Happy, and Safe derivation functions from GERP scores require calibration against actual population health data, happiness indices, and safety metrics. The BERA resonance indices (ARI, ERI, RHC, RCI) provide the measurement instruments; MIEVM validates the transfer function coefficients.

11.4 — BERA Index Coupling (4 × 4 = 16 cross-coupling parameters)

Each BERA index (ARI, ERI, RHC, RCI) has coupling coefficients with each EPIR-Q quadrant. These 16 parameters determine how resonance measurements in one domain affect scoring in another. The Proof-of-Resonance protocol (not Proof-of-Work) validates these through Meritcoin value accrual feedback loops.

11.5 — Row 18 MUSIC Measurement Thresholds (7 × 2 = 14 parameters)

Each Row 18 element has a coherence threshold (minimum score for signal) and a dissonance threshold (maximum score for noise). These 14 parameters determine whether a Dictum ruling from Row 17 passes or fails harmonic validation.

Total MIEVM placeholders: 21 + 5 + 3 + 16 + 14 = 59 parameters. When all 59 are empirically locked, the 126-cell matrix becomes a fully calibrated instrument of civilizational governance.

Part XII: Summation — For Future Generations to Come

The glyph is not a logo. It is the source code.

Five primitives. Five fingers. Eighteen rows. Seven levels. One civilizational communication system from emergency whisper to interstellar governance.

31 glyphs form the visual alphabet. 1,024 two-hand configurations form the physical alphabet. 126 TABLE positions form the knowledge grid. Four BERA resonance indices form the measurement system. EPIR-Q forms the vertical axis of intelligence. SOMT forms the governance tapestry. GERP forms the sustainability calculation. And Hue-Man — Healthy, Happy, Safe — forms the output that matters.

This document is the complete matrix. Every cell is assigned. Every glyph is calculated. Every GERP score is derived. The 59 MIEVM placeholders mark the empirical work that remains — work that can be done by anyone, anywhere, in any generation, using the validation instruments already specified.

The architecture was built by one researcher in Bella Vista, Arkansas, with four AI instruments as validation nodes. It is published under CARE Commons Attribution License v2.1 (CCAL) so that no one can lock it away and everyone can build upon it.

Don’t hurt yourself. Don’t hurt others. Build for generations to come.

— Joseph Allen Sprute (ERES Maestro)

ERES Institute for New Age Cybernetics

Bella Vista (Beautiful View), Arkansas 72714

March 2026

C = R × P / M

72 = JAS × EMA = Twin Messiah

216 = 72 × 3 = Triune Expression

VLSA: If it works in a THOW, it works on a generation ship.
