The principal categories of existence fall into "17" rows (Layers) of "7" subjects (Levels), whereas the selection and combination of items relative to the self extend into the universe and can be seen as help and use for law and energy by those willing to participate for the good of what is BEST-SOUND.

By making data available to a Global Actuary Investor Authority (GAIA) and “IT’S” Sociocratic Overlay Metadata Tapestry (SOMT), large scale problems can be seen and dealt with at an appropriate level (Using ERES PERC/BERC/JERK) establishing Relative Energy Equal Pay (REEP) through Gracechain UBIMIA given the importance and duration with a Community of Interest (COI) sharing Bio-Ecologic Service Level Agreements (BODY) with evidence making App-Parent scientific means for adjusting social norms and morays using Big Data.

By logging onto your account and organizing your work according with keyword categories, ERES illuminates Questions with resulting Answers underpinning Local-Global RT Empirics using the following Keyword Matrix by connecting EarnedPath with Situational User-GROUP Demonstrations (SIMS):

ERES PlayNAC “HowWay”

- User-GROUP SLA Initiated: A Number Anyone Can Call For Real Help
- AnswerQuestion posed by Questioner: EMCI Initiation
- System Relevancy Defined: SLA Query
- P^3 Interpretation Garnered: Questioner DEF-REL Inquiry
- Permission Defined: Established Security LEVEL(s/S/\$)
- User-GROUP Notified: Detail Rendered
- User-GROUP Assigned: Reaction Notice Generated
- Questioner QuestionAnswer Rendered: $SIM-GEN\ \$EL(L) = Law \times Market(s/S/\$) + List\ View$
- QuestionAnswer Reviewed: Actuary Data Population Keys Made-Read-Fed
- Questioner Awarded Credit as: NAC UBIMIA x SOMT Update + GAIA DEF-REL (Generational Bonds Established)
- As = Defined in Context by NAC: GAIA General Ledger (GGL) Updated
- NAC User-GROUP SLA Updated: NBERS pays Questioner(s) UBIMIA

METHODS

- AnswerQuestion is dependent on “your” Dictum rating, which is a function of “ABC” Semantic Digital-Spiral Record (Biometric Confession)
- A well-formed answer relates the question context and must conform to rules-based assignments leading to User-GROUP Outputs
- Every principal keyword forms the basis for a COI Cognitive Relation, which can involve many sub-domain COIs, down to three levels (GAIA P^3)
- Every domain is User/GROUP controlled and regulated (CBGOMDD FAVORS)
- LEVELS HAVE RULES BASED ANSWERS DEFINING WELL-FORMED QUESTIONS (SCIENTIFIC METHOD x Semantic Ontology + SOMT REF-DEL)
- LEVEL CONTROLS: first level (\$ELF PERC) = personal, second = public (GAIA BERC), third = private (SOMT JERC): NBERS
- EVERY GAIA “VOTE” CONSTITUTES A GLOBAL RULING CONCERNING A SPECIFIC USER/GROUP “DOMAIN”: Relates GCF
- Big Data forms an initial “BASIS” for GAIA SOMT (AI) rulings concerning a domain, or keyword within a domain: EP RT Media
- Domain “Intelligence Stacks” represent numeric values used for calculating Dictum and INPUTs relative to User/GROUPs: Ratings-Scores
- Domains are classified according with Area(s) of Distinction (Worthy of Description): Centers of Excellence
- A ruling “governance framework” uses environmental history to classify social, economic, political, legal, technical and administrative
- SEE ERES Talonics in connection with Semiosphere: THOW FDRV HFVN GSSG
- **NOTE:** Non-Punitive Remediation is a function of Paineology: https://drive.google.com/open?id=1qUi_S7pALLa4msm8L8NGYtKMin6Dt6SiF_QHTAULK5k
- **KEY:** GAIA = Global Actuary Investor Authority (72 Principal Industries), contingent on VERTECA SECUIR CyberRAVE: Gunnysack
- **COMMENTARY:** The calculus for defining GAIA is subject to PlanET UNI.verse, and $S=E/23(1/x)$ #C=R*P/M @E=MC²
