About

ERES Institute for New Age Cybernetics is a solo-founded research organization established in **February 2012** in Bella Vista, Arkansas. Its mission is to engineer a Global Actuary Investor Authority using Game Theory and **PlayNAC** — an Empirical Realtime Education System mapping Personal, Public, and Private ontologies onto a shared 1,000-Year Future Map.

The framework is authored by **Joseph Allen Sprute** (ERES Maestro), U.S. Army veteran and solo independent researcher, with **408+ publications** on ResearchGate and a timestamped prior-art record dating to the CyberRAVE era (pre-1997).

The Governing Formula

```
C = R × P / M
```

```
Cybernetics = Resource × Purpose ÷ Method
```

This is the foundational equation of New Age Cybernetics. Two companion canonical keys complete the **Triune Math**:

Key	Formula	Reading
1	`C = R × P / M`	Cybernetics = Resource × Purpose ÷ Method
2	`M × E + C = R`	Matter × Energy + Constant = Reason
3	`REAL = (E·M·R) / (T·S)`	Energy · Matter · Resonance over Time · Space

Core Frameworks

- **PlayNAC** — Game-theoretic Empirical Realtime Education System
- **GiantERP** — Earth Resource Planner (1,000-Year Future Map)
- **EarnedPath** — CPM × WBS + PERT progression for Global Actuary Investor Authority
- **UBIMIA** — Universal Basic Income + Merit, Investment, Awards
- **Meritcoin / Gracechain** — Proof-of-Resonance economics (not Proof-of-Work)
- **BERA Indices** — ARI, ERI, RHC, RCI (Aura Resonance, Environmental Resonance, Resonant Harmony Cycle, Resonant Coherence Index)
- **SCALULAR** — Scalable Certification Architecture for Lifelong Universal Learning and Adaptive Resilience
- **FAVORS / CBGMODD** — Federated resource and governance data architecture
- **SPT Triad** — Security, Privacy, Trust (ERES-SPT-2026-001)
- **GAIA SOMT GEAR** — Sociocratic Overlay Metadata Tapestry

Repositories at a Glance

Repository	Purpose
`.github`	Organization profile (this page)
`Support-Documentation`	Packaged R&D for PlayNAC KERNEL
`Gracechain-Meritcoin`	Merit-based blockchain economics
`PlayNAC-KERNEL`	PDF archive of the KERNEL specification

Repository	Purpose
`Proof-of-Work_MD`	Genesis markdown archive (corpus)
`NAC_Images`	Visual assets (CC0-1.0)
`ZIP`	PlayNAC KERNEL codebase
`Discussions`	Community forum
`Workflows`	CI/CD architecture (BEST / SOUND / GOOD)
`ERES-Relativity-Equation`	JAS LLM Relativity Equation

MIEVM — Multi-Instrument Ensemble Validation Method

All ERES specifications are validated across a four-instrument AI ensemble: **Claude, Grok, DeepSeek, ChatGPT**. The ensemble was culled from a larger pool under bandwidth constraints of solo research, using the same constraint-based epistemology that produced the 72 Key Domains from the Register of Collective Indices. MIEVM operates as an Instrument-of-Faith: no single instrument is canonical; convergence across the ensemble is the validation signal.

History

- **Pre-1997 — CyberRAVE era:** 72 Key Domains culled from the Register of Collective Indices; Global_VPN work.
- **1997–2012 — SaleBuilders era:** Marketing R&D foundation.
- **February 2012–present — ERES Institute:** Framework consolidation, publication, and standards submission.

Filings

- **Hague submission:** `ERES-HAGUE-2026-001` (filed March 7, 2026)
- **DBDM 2026 Sydney:** FAVORS-BERA paper (v5 AIRCC-compliant)
- **Executive Order draft:** `ERES-EO-DRAFT-2026-001` (MIEVM-validated: Claude 8.77, Grok 10/10, DeepSeek 9.8/10)
- **ISO/ANSI, SSRN, White House** submissions on record
