Purpose

A **visual asset library** supporting the ERES corpus: logos, dashboard mockups, matrices, equation visualizations, propulsion and engineering concepts, and AI-generated concept art.

The images exist to help the framework travel — to be embedded in papers, presentations, blog posts, and teaching materials without friction.

License Exception — Why CC0

Unlike the rest of ERES (which is CCAL v2.1), **NAC_Images is released under CC0-1.0** — full public domain dedication.

> Visual assets are released into the public domain to maximize their utility as communication tools. The images exist to spread the framework, not to protect it.

> *"Build for generations to come" — and give them the pictures to build with.*
