

ERES TERMS #44 - ADDENDUM

Newly Discovered Terms from Comprehensive Search

Sources: GitHub repositories, Medium articles, Twitter/X, and conversation history

NEWLY DISCOVERED TERMS

HUOS

ERES Original: HUOS - Humanity's Unified Operating System

Source: Medium article 'Unified Operating System for Humanity' (April 2025)

Definition: Planetary protocol integrating EarnedPath, UBIMIA, and GAIA to synchronize collective human advancement. A global framework for civilization management combining individual merit, collective intelligence, and ecological stewardship.

Standard Equivalent: Planetary Operating System; Global Coordination Framework; Civilization Management Protocol

COI

ERES Original: COI - Collective Optimal Intelligence

Source: Medium article 'Unified Operating System for Humanity' (April 2025)

Definition: Integration of collective human intelligence with AI systems to achieve optimal decision-making at planetary scale.

Standard Equivalent: Collective Intelligence System; Swarm Intelligence; Distributed Decision-Making Network

S³ Cities

ERES Original: S³ Cities - Semantic Smart Sustainable Cities

Source: Medium article 'The Aura Resonance Index (ARI)' (September 2025)

Definition: Cities where Operators use real-time semantic data processing to resolve systemic imbalances through smart, sustainable infrastructure with meaning-aware systems.

Standard Equivalent: Smart Sustainable Cities; Semantic Urban Systems; Intelligent Eco-Cities

FOO

ERES Original: FOO - Family-of-Options

Source: Medium article 'The Aura Resonance Index (ARI)' (September 2025)

Definition: Suite of tools within HUOS including ARI, GERP, MERITCOIN ledger, and other integrated systems providing options for different implementation contexts.

Standard Equivalent: Tool Suite; Integrated Systems Framework; Modular Platform Components

REAL Formula

ERES Original: $REAL = (E \cdot M \cdot R) / (T \cdot S)$

Where: E = Earned Intent, M = Moral Design, R = Resonance, T = Time, S = Structure

Source: Medium article 'The Aura Resonance Index (ARI)' (September 2025)

Definition: Formula defining sustainable reality through the relationship between earned intent, moral design, and resonance over time and structural constraints.

Standard Equivalent: Sustainability Index Formula; Reality Coherence Equation; Systems Alignment Metric

Operators

ERES Original: Operators - Stewards/users of ERES systems in S³ Cities

Source: Medium article 'The Aura Resonance Index (ARI)' (September 2025)

Definition: Individuals who use ARI Dashboard and other ERES tools to monitor and improve resonance in communities. Anyone earning their path through system participation.

Standard Equivalent: System Stewards; Platform Users; Community Coordinators

Semiosphere Components

ERES Original: Four-part Semiosphere architecture - Boundary, Perciphere, Center, Protosphere

Source: Medium article 'The Aura Resonance Index (ARI)' (September 2025)

Definition: Four-layer semantic architecture for processing syns (systemic imbalances) and turning data into meaningful actions within the sign-based world.

Standard Equivalent: Semantic Processing Layers; Meaning-Making Architecture; Semiotic Processing Framework

Syns

ERES Original: Syns - 'Inherited sins/syns of the world' (systemic imbalances)

Source: Medium article 'The Aura Resonance Index (ARI)' (September 2025)

Definition: Systemic imbalances and knowledge flaws inherited from past generations that create ongoing problems. Play on 'sins' and 'synchronization' failures.

Standard Equivalent: Systemic Imbalances; Legacy Problems; Inherited Structural Flaws; Historical Injustices

CBGMOD

ERES Original: CBGMOD - Citizen Business Government Military Ombudsmen Dignitary (old version)

Source: Medium article 'Type-Casting' (March 2024)

Definition: Original six-layer stakeholder architecture, later revised to CBGOMDD (seven layers) with Ombudsman moved between Government and Military.

Standard Equivalent: Multi-Stakeholder Governance Model v1.0; Six-Layer Representation Framework

AI Ledger Criteria (10-Point System)

ERES Original: 10 criteria for evaluating AI systems

Source: Twitter/X @JosephASprute

The 10 Criteria:

1. General Intelligence
2. Relative Experience
3. Specific Knowledge
4. Global Appeal
5. National Interest
6. Local Dynamics
7. Stated Unity
8. Creative Design
9. Historical Foundation
10. Economic Well-Being

Standard Equivalent: AI Evaluation Framework; Machine Intelligence Assessment Criteria

Digital Merit Contracts

ERES Original: Digital Merit Contracts (from HUOS framework)

Source: Medium article 'Unified Operating System for Humanity' (April 2025)

Definition: Smart contracts that automatically execute based on verified merit contributions, integrated with HUOS and Meritcoin systems.

Standard Equivalent: Merit-Based Smart Contracts; Contribution-Triggered Agreements; Verified Impact Contracts

Aura-Tech (Extended)

Additional Context from Medium articles:

Includes Kirlian photography integration, Munsell color spectrum analysis, and real-time bio-electric field visualization in AR/VR environments for S³ Cities Operators.

NWO Evolution Context

ERES Original: Reference to 'how NWO evolves Significant Business Computer #666'

Source: Twitter/X @JosephASprute, ERES Institute General Description

Definition: ERES framework's relationship to New World Order concepts and the symbolic 'Business Computer #666' representing global economic systems.

Standard Equivalent: Global Economic System Evolution; International Governance Transition

C-Structurel

ERES Original: Gunnysack 'C-Structurel'

Source: EarnedPath WordPress (2017)

Definition: Structural component of Gunnysack portable service bundles, representing the container architecture for smart city utilities.

Standard Equivalent: Container Structure; Service Bundle Architecture; Portable Framework

ADDITIONAL CONTEXTUAL TERMS

The following terms were found in context and provide important background:

- Global Protectorate - System for obtaining Earth's 'permission' to cipher Aurora Borealis
- Bio-Electric Reality - Core concept that aura defines reality and intent
- Gas Vapor Emission Detection from Living Matter - Advanced optics capability referenced in Type-Casting article
- Graceful Evolution - System enabling non-punitive progress through Earth changes
- Command and Control over Metadata - Goal of ERES systems for governance
- Feeding The Beast - Reference to how personality types contribute to system outcomes
- 1000-Year Future Map - Long-term planning framework for regenerative living

SEARCH COMPLETION SUMMARY

Sources Searched:

- ✓ GitHub - ERES-Institute-for-New-Age-Cybernetics repositories
- ✓ Medium - @josephasprute articles (2024-2025)
- ✓ Twitter/X - @JosephASprute historical posts
- ✓ EarnedPath WordPress - Historical documentation
- ✓ Conversation history - All Claude.ai discussions
- ✗ Threads @josephasprute - Blocked by robots.txt
- ✗ Substack - No accessible public posts found

Total Terms Added in This Addendum: 13 major terms + 7 contextual concepts

Combined with ERES TERMS #43 base document: 250+ total terms documented

--- END OF ADDENDUM ---

This addendum completes the comprehensive search across all available ERES documentation.

ERES TERMS #44 + Addendum = Complete Terminology Archive
