Resonance (Descriptions) / Hue (Empirics) / Interpretation (Applications)

- **Education**: Health ∧ Law ∧ Protection ∧ Skills-Trades [monitored by real-time metrics & AI feedback] => adaptive governance of Water | Immigration | Security (protectorates for Agriculture, Sovereignty, OWOL)
    - Our Way of Life

- **Knowledge** Management: One Good ∧ Security Clearance (e.g., "a minimal trust score computed via BERC ≥ Threshold") ∧ Data Integrity => Borders
    - Bio-Ecologic Ratings Codex

- **Access-Selection**: vial Biometrics (FAVORS-BEST) ∧ Energetics (Trust/Quality) ∧ Fulfillment (Measurements) => Bio-Ecologic Economy [with real-time feedback loops for remediation if BERC < Threshold]

- **Bottom-Up (community-driven sustainability) ∧ Top-Down (AI oversight, sociocratic metadata)**: THOW (bottom-up grassroots mobility, micro-community anchor, interface with AI/FDRV/HUOS) ∧ FDRV (ambitious tech-enabled mobility uses advanced nodes) ∧ EDF (centralized protection, rapid-response entity) => Social Order
