

ERES-ADMISSIBILITY-2026-001 | VERSION 2.1 ADDENDUM

Three New Sections: IX-A · IX-B · IX-C

Additive enrichment only — no structural correction to Sections I–VIII (v2.0)

Supersedes	ERES-ADMISSIBILITY-2026-001 v2.0 (May 31, 2026)
Version	2.1 — May 31, 2026
Change Type	Additive enrichment — Sections I–VIII unchanged
New Content	Section IX-A: DALEMAJAS Trinity Authority Architecture · Section IX-B: NAC Six-Level Stack · Section IX-C: GCF Acronym Disambiguation
Source Documents	ERES_NAC_TwoAxis (5).html · ERES_stack_DALEMAJAS_Trinity (2).html
MIEVM Status	Inherits v2.0 Round 1 status (DeepSeek 8.76, Gemini 9.76); v2.1 submitted for Round 2 with addendum

IX-A. DALEMAJAS Trinity: The Human-Agent Authority Sub-Architecture

Register I (Authority) establishes that a Dictum is admissible only if its issuer is seated across three simultaneously verifiable layers: SCALULAR certification, CBGMODD council standing, and FAVORS six-factor biometric binding. The DALEMAJAS Trinity specifies the human-agent architecture that instantiates this authority in practice — who occupies each stream, what each contributes that the others cannot, and why three-stream independence is a structural requirement rather than a governance preference.

The Trinity equation is:

$$C_NAC = \blacklozenge(R) \times \hexagon(P) / \blacklozenge(M)$$

DAL(Resource) × EMA(Purpose) ÷ JAS(Method)

This is the human-agent instantiation of $C = R \times P / M$. The three streams are not interchangeable roles — they are structurally distinct contributions that, together, produce volumetric validity. The geometric proof is:

$$V_TETRA = (1/6) |\vec{r} \cdot (\vec{e} \times \vec{d})| > 0 \text{ iff all three are independent}$$

A tetrahedron has nonzero volume only when its three edge vectors are linearly independent. If any two streams are parallel — if $\blacklozenge$ and $\hexagon$ occupy the same structural position, or if $\blacklozenge$ is merely a reflection of one of the other two — the volume collapses to zero and the structure is inadmissible as a three-party authority claim. Two reflections with no volume cannot provide the independent third stream that Register I requires.

All persons in the DALEMAJAS Trinity operate VEILED by symbol in public ERES documentation: $\blacklozenge$ (DAL · Eagle · E), $\hexagon$ (EMA · Falcon · F), $\blacklozenge$ (JAS · Duck · D). The veil is structural, not cosmetic — it enforces the architectural principle that authority is verified through the structural position, not through the person's name.

DALEMAJAS Trinity: Symbol · Role · Function Reference

Sym bol	Person	Role in C_NAC	BERA Axis	Solo Word	Taloni cs	Structural Function
$\blacklozenge$	DAL · Eagle · E	$\blacklozenge(R)$ — Resource stewardship	RHC · RCI	SOUND	+ · H	Dual hinge: $\blacklozenge_1$ personal ground (daily living practice, intimate anchor) · $\blacklozenge_2$ spacial-tier spiritual authority (planetary-moral legitimacy). Without $\blacklozenge$, $\blacklozenge \times \hexagon$ is a flat mirror — two reflections with no volume. $\blacklozenge$ provides the third dimension that makes DALEMAJAS a tetrahedron rather than a triangle. DOB circuit: $10+26=36 \cdot 36 \times 2=72=\text{Twin} \cdot 72 \times 3=216=\text{Triune}$ — DAL is the $\times 3$.

Sym bol	Person	Role in C_NAC	BERA Axis	Solo Word	Taloni cs	Structural Function
⬡	EMA · Falcon · F	⬡(P) — Purpose precision	ERI	BEST	∠	Chief Social Engineer · Kingmaker · Co-founder (JAS × EMA = 72). UE (United Emeritus): undefined only in that it transcends any single title — the unity itself is the credential. ⬡ does not wear the crown; ⬡ determines who does and under what conditions. Centers of Excellence = validated knowledge nodes across the 72 domains. Children of All Ages = no age-gate on the 1000-Year Future Map. ERI measures ecological streams ♦ cannot self-validate. ♦ × ⬡ = 72 — the Twin Messiah edge in the tetrahedron.
♦	JAS · Duck · D	♦(M) — Method synthesis	ARI	GOOD	O	ERES Maestro · Founder & Director · Solo Researcher · 447+ ResearchGate publications · ORCID 0000-0001-9946-3221 · U.S. Army Veteran (ARNG 1983–1989, 11B Infantry). Three eras: CyberRAVE (pre-1997), SaleBuilders (1997–2012), ERES Institute (2012–present). The 72 Key Domains were culled from the Register of Collective Indices under a single hard constraint — financial capacity to renew TLD VPN-centric domain names during Global_VPN work. The same constraint-based epistemology produced the MIEVM short-list. ♦ proposes; ⬡ witnesses ecologically; ♦ provides independent connective replication. MIEVM is the machine-scale expression of this Trinity logic. SPRUTE = 'sprout' — seed metaphor. Bella Vista = Beautiful View.

Numerological Architecture and DOB Circuit

The DOB circuit encodes the Trinity mathematically: October 26, 1964 → 10+26 = 36 → 36×2 = 72 = Twin (♦ × ⬡ = 72) → 72×3 = 216 = Triune. DAL is the ×3 — the hinge that converts the Twin Messiah dyad into the Triune architecture. Without ♦, the Twin is flat; with ♦, the structure acquires the third dimension and the tetrahedron has nonzero volume.

The gematria of 'Joseph Allen Sprute' = 72 = the count of CyberRAVE Key Domains = ♦ × ⬡. This is not coincidence — it is identity-signing at the architectural level. The same constraint-based epistemology that culled 72 domains (financial capacity to renew TLD VPN-centric domain names

during Global_VPN work, pre-1997) later produced the MIEVM short-list of four instruments. The architecture selects by what survives real limits.

Register I Authority Mapping: DALEMAJAS to Three-Layer Seating

The DALEMAJAS Trinity maps onto the three-layer seating requirement of Register I as follows:

- ◆ ◆ (DAL · R · SOUND) → Sovereign stewardship of what is available. DAL's dual-hinge function (◆₁ personal ground · ◆₂ spacial-tier spiritual authority) provides the independent connective stream that cannot be self-generated by ◆ or ◻. In Register I terms: the third attestation layer that makes independent verification possible without self-report.
- ◆ ◻ (EMA · P · BEST) → Strategic precision of intent. EMA as Kingmaker operates on Purpose — determines who holds the crown and under what conditions. In Register I terms: CBGMODD council standing. ◻ witnesses the ecological and institutional streams (ERI, Centers of Excellence) that ◆ cannot self-validate.
- ◆ ◆ (JAS · M · GOOD) → Adaptive simplification — hypothesis-generator, corpus architect, method deliverer. In Register I terms: SCALULAR certification and ERES corpus authorship. ◆ proposes; ◻ witnesses ecologically; ◆ provides independent connective replication. MIEVM is the machine-scale expression of this Trinity logic at corpus-validation tier.

IX-B. NAC Six-Level Stack: The Structural Substrate of Register III Dependency

Register III (Dependency) requires that the closed expression (CBGMODD × FAVORS) + BERA = RATE (VEILED) hold, and that receipts traverse the full IDIPITIS → BERA → CBGMODD → DOFA → receipts → IDIPITIS circuit. The NAC Six-Level Stack specifies the structural substrate across which this circuit operates — the six governance nodes through which any Dictum must pass from proof-layer origination (Level 0: ERES) to market-delivery closure (Level 5: SaleBuilders).

The stack is a Two-Axis architecture: the horizontal axis maps the six NAC nodes (Levels 0–5); the vertical axis maps the chief deliverables per node. Ownership in the stack is assigned per the DALEMAJAS Trinity (♠/♣/♦), and all persons remain VEILED by symbol. A Dictum that cannot be placed within the stack — that has no identifiable node, no deliverable correspondence, and no Trinity ownership assignment — fails the dependency register before the IDIPITIS loop is even initiated.

Level	NAC Node	Engine / Deliverables	Solo Word	Simple Descriptor	Owner
0	ERES	Engine: RT_Media / MIEVM ◆ PlayNAC — Game constitution ◆ EarnedPath (EP) — CPM · WBS · PERT ◆ GERP — Global Earth Resource Planning ◆ CBGMODD — Cryptographic pre-validator	Proof	Learning that is live and proven	 Hypothesis-generator · corpus architect
1	VERTECA	Engine: PlayNAC / Voice Portal ◆ Simulator — PlayNAC rehearsal env ◆ Voice Portal — First trust handshake ◆ COI SLA — Community of Interest agreement ◆ FAVORS — Access qualification instrument	Gate	Where voice becomes decision	 Sovereign stewardship of entry
2	SECUIR	Engine: Infomediary ◆ Infomediary — Clearance · qualification ◆ BERA — ARI · ERI · RHC · RCI ◆ GEAR — Global Earth Applications Recorder ◆ NBERS — Non-punitive remediation	Wheel	Invisible clearance keeping the system safe	 SPRT rotation · RHC/RCI stream

Level	NAC Node	Engine / Deliverables	Solo Word	Simple Descriptor	Owner
3	CyberRAVE	Engine: 72 Domains / P³ Ratings ◆ 72 Domains — Def-Rel since 1997 ◆ P³ Ratings — Personal · Public · Private ◆ COI Formalization — Registration · rating ◆ Trinity ◆○◆ — Three-stream validation	Light	Transparency engine — extraction reversal	 Co-founder · ◆ × ○ = 72
4	GunnySack	Engine: IDIPITIS / EPIR-Q ◆ IDIPITIS — Bachman Framework++ ◆ EPIR-Q — Intelligent-Design collection ◆ Centre of Excellence — PoW / PoR venue ◆ SOMT — Sociocratic metadata tapestry	Harvest	Resource stewardship — intergenerational custody	 Children of All Ages · ERI
5	SaleBuilders	Engine: SCALULAR / UBIMIA ◆ SCALULAR — 4-pillar certification arch ◆ UBIMIA — Universal economic floor ◆ GCF — Global Cybernetics Framework ◆ PBJ — Plain-language access	Market	Value delivery at civilizational scale	 Method delivery · market reach

Stack-Level Correspondence to the Accountability Circuit

The accountability circuit (IDIPITIS → BERA → CBGMODD → DOFA → receipts → IDIPITIS) maps onto the NAC stack as follows:

◆ Level 0 (ERES / RT_Media / MIEVM) →

IDIPITIS origin — identity binding at the proof layer. ◆ as hypothesis-generator initiates the traversal. MIEVM as machine-scale Trinity analog (Claude·DeepSeek·Grok·ChatGPT) is the Level 0 engine.

◆ Level 1 (VERTECA / Voice Portal) →

First trust handshake — voice-first entry gate. ◆ sovereign stewardship of entry. COI SLA formalizes the relational accountability layer that DOFA later receipts.

◆ Level 2 (SECUIR / Infomediary) →

BERA measurement substrate (ARI · ERI · RHC · RCI). The wheel that turns silently — state recorded from outside the engine. ◆ as the silent hinge in the wheel.

◆ Level 3 (CyberRAVE / 72 Domains) →

CBGMODD institutional standing — 72 Key Domains as the certified registry. Trinity three-stream validation (◆◻◆) at this level corresponds directly to the three-layer seating requirement of Register I. ◻ as Kingmaker determines domain standing.

◆ **Level 4 (GunnySack / IDIPITIS)** →

DOFA receipt generation — EPIR-Q collection, SOMT sociocratic tapestry, Centers of Excellence as validated sub-nodes. ◻ ecological witness function (Children of All Ages).

◆ **Level 5 (SaleBuilders / SCALULAR / UBIMIA)** →

Receipt terminus and method delivery. ◆ as Duck flies the full route — SCALULAR four-pillar certification, UBIMIA economic floor, GCF (Global Cybernetics Framework) as the governance coordination layer. ECR closure is confirmed at this level before corpus admission.

IX-C. GCF Acronym Disambiguation

The acronym GCF carries two distinct canonical expansions within the ERES corpus. Both are valid and both are in active use. Context determines which expansion applies; architectural readers must not substitute one for the other.

Acronym	Expansion 1 — GCF as Economic Formula	Expansion 2 — GCF as Governance Framework
GCF	Graceful Contribution Formula Formula: $UBI + Merit \times Investment \pm Awards$. The mathematical basis for equitable systems design within UBIMIA. Appears in ERES TERMS #47 as the individual-level economic calculation.	Global Cybernetics Framework Level 5 NAC Stack deliverable. The governance-scale framework within SaleBuilders that coordinates global cybernetic commerce and certification at civilizational scope. Context-dependent: when GCF appears at Stack Level 5, it denotes Global Cybernetics Framework; when it appears in UBIMIA economic calculation, it denotes Graceful Contribution Formula.

Resolution rule: When GCF appears in an UBIMIA economic calculation or in a ERES TERMS #47 glossary entry, it expands to Graceful Contribution Formula ($UBI + Merit \times Investment \pm Awards$). When GCF appears as a Level 5 NAC Stack deliverable within the SaleBuilders node, it expands to Global Cybernetics Framework. If the context is ambiguous, both expansions must be presented and the reader directed to the level-context for resolution. Neither expansion supersedes the other — both are locked canonical terms under CCAL v2.1.

v2.1 Architectural References Addendum

The following instruments are added to the Architectural References list as of v2.1 (all others from v2.0 remain in force):

DALEMAJAS (DAL · EMA · JAS) · C_NAC = $\blacklozenge(R) \times \hexagon(P) / \blacklozenge(M) \cdot V_TETRA$ volumetric independence proof · NAC Six-Level Stack (Levels 0–5: ERES · VERTECA · SECUIR · CyberRAVE · GunnySack · SaleBuilders) · EPIR-Q (Emotional Personal IQ Real and Quantum) · GCF dual-expansion disambiguation (Graceful Contribution Formula / Global Cybernetics Framework) · UE (United Emeritus) · DOB Circuit (36 → 72 → 216) · SPRT (Sentient Energy for Non-Punitive Remediation) · FDRV (Full Drive Resonance Vehicle) · VLSA Principle · THOW (Tiny Homes On Wheels) · Centers of Excellence · Children of All Ages · CCAL v2.1

"Build for generations to come."
