

ERES PLAYNAC

Semantic Keyword Ontology

User-GROUP Semantic Ontology for Simulator · 18 Layers × 7 Levels = 126 COI Cells

LIVING DOCUMENT · Canon-Sensitive · v1.0 — June 2026

1. Document Identity

Document Title	ERES PlayNAC Semantic Keyword Ontology
Subtitle	User-GROUP Semantic Ontology for Simulator — Living Document
Version	v1.0 — June 2026
Date	June 2, 2026
Author / Director	Joseph Allen Sprute (JAS) — ♦ ERES Maestro
Institute	ERES Institute for New Age Cybernetics (est. February 2012)
Location	Bella Vista, Arkansas, USA
ORCID	0000-0001-9946-3221
License	CARE Commons Attribution License v2.1 (CCAL)
Status	LIVING DOCUMENT — Canon-Sensitive Updates logged by version
Structure	18 Layers × 7 Levels = 126 COI Cells
Talonics Lock	126 cells = Talonics Complete Symbol Matrix cell-space
SOMT Role	Semantic Ontology Registrar (triple-equality: SOMT === Semantic Ontology Registrar)
Related Documents	ERES-HOW-PLAYNAC-2026-001 v1.0 ERES TERMS #47 UBIMIA Manual v1.1 eres_trilogy_FINAL.py

2. Master Ontology Table — 18 Layers × 7 Levels

Each row is a keyword-domain (Layer). Each column is a position within that domain (Level 1–7). Every cell = a potential Community of Interest (COI) node. 126 total cells = Talonics Symbol Matrix cell-space.

L#	LAYER	Level 1	Level 2	Level 3	Level 4	Level 5	Level 6	Level 7
1	NEEDS	Water	Food	Shelter	Work	Love	Overall	Always
2	ELEMENTS	Weather	Which	Entity	Thought	Energy	Sound	Good
3	ACTIONS	Engage	Connect	Collaborate	Transact	Mobile	Analytics	Learn
4	SCALE	Self	Family	Community	Nation	Planet	World	Universe
5	DOMAINS	Personal	Public	Private	Syntax	Class	Method	Variable
6	SECTORS	Social	Economic	Political	Legal	Technical	Administrative	History
7	STACK	Physical	Data	Network	Transport	Session	Presentation	Application
8	FORCES	Of	Order	Wisdom	Belief	Power	Imagination	Will
9	ESSENCE	Principle	Mind	Soul	Spirit	Life	Truth	Evolution
10	QUERY	With	Who	What	Where	When	Why	How
11	COMMONS	Help	Use	Energy	Law	Common	Use	System
12	VICES	Lust	Gluttony	Greed	Sloth	Wrath	Envy	Pride
13	ARTS	Grammar	Rhetoric	Logic	Arithmetic	Geometry	Music	Astronomy
14	VIRTUES	Chastity	Temperance	Charity	Diligence	Patience	Kindness	Humility
15	REMEDIES	Prudence	Justice	Remediation	Courage	Faith	Hope	Compassion
16	EMOTIONS	Joy	Anger	Anxiety	Pensiveness	Grief	Fear	Fright
17	INPUT	Keyword	Keyword	Keyword	Keyword	Keyword	Keyword	Keyword
18	MUSIC	Rhythm	Melody	Harmony	Timbre	Expression	Composition	Performance

★ **Layer 13 / Level 6 (Music)** = Music as Liberal Arts discipline (Quadrivium). ★ **Layer 18 (MUSIC — Orbiter)** = Music opened as full measurement architecture for all 17 layers above. Two distinct roles; neither supersedes the other.

3. Layer Descriptors — One-Word Labels & Canonical Descriptions

L#	LABEL	CANONICAL DESCRIPTION
1	NEEDS	Foundational human necessities — the irreducible floor of existence.
2	ELEMENTS	Environmental and perceptual primitives — what surrounds and differentiates.
3	ACTIONS	Operative verbs of participation — how agents move through the world.
4	SCALE	Concentric rings of identity and governance — from the individual to the infinite.
5	DOMAINS	Ontological access tiers — the P ³ personal-public-private architecture plus code primitives.
6	SECTORS	Institutional dimensions of organized society — the SEPLTA governance spine.
7	STACK	OSI-aligned computational layers — mapping digital infrastructure onto human systems.
8	FORCES	Directive-generative forces — the invisible architectures that shape action and meaning.
9	ESSENCE	Metaphysical and ontological anchors — the deepest registers of being.
10	QUERY	Interrogative-relational operators — the seven questions that constitute any inquiry.
11	COMMONS	Shared-resource governance primitives — the Help/Use/Energy Law at the heart of ERES.
12	VICES	The Seven Deadly Sins — negative attractor states requiring Non-Punitive Remediation.
13	ARTS	Trivium + Quadrivium — the classical Liberal Arts as knowledge architecture. Music at Column 6.
14	VIRTUES	The Seven Heavenly Virtues — positive attractor states and remedial targets.
15	REMEDIES	Applied ethical capacities — the corrective and aspirational operating principles.
16	EMOTIONS	Primary emotional states — affective signal layer feeding Dictum calibration.

L#	LABEL	CANONICAL DESCRIPTION
17	INPUT	Runtime gateway — Level 1: Question Level 2: Answer Level 3: Dictum. User/GROUP assigned.
18	MUSIC	ORBITER — Measurement layer. Reads all 17 layers above as signal. Coherence validator for Dictum output.

4. Structural & Canon Notes

Element	Canon Note
Layer 17 — INPUT	Runtime gateway only. Not pre-locked. Level 1 = Question, Level 2 = Answer, Level 3 = Dictum. Keywords are User/GROUP assigned at session time. The Dictum is the scored ruling that resolves a question at its third (private) level.
Layer 18 — MUSIC (Orbiter)	Measurement layer. Reads all 17 layers above as signal. Its 7 levels map simultaneously across musical theory, Fourier/signal mathematics, ERES resonance processing, and PlayNAC governance. NOT a content layer — it is the coherence measurement architecture for any Dictum produced at Layer 17.
Music at Layer 13, Column 6	MUSIC appears as Column 6 of the Liberal Arts row (Grammar · Rhetoric · Logic · Arithmetic · Geometry · Music · Astronomy). This is Music as academic discipline (Quadrivium). Layer 18 is Music opened as measurement architecture. Two distinct appearances; neither supersedes the other.
Level Controls	Level 1 = Personal Level 2 = Public Level 3 = Private. Governance tier classification applies across all 18 layers.
126 Cells = Talonics Matrix	$18 \times 7 = 126$. This is the exact cell count of the Talonics Complete Symbol Matrix. PlayNAC Semantic Keyword Ontology = Talonics Symbol Matrix cell-space. Keyable via Talonics 5-Finger Instrument.
SOMT Registration	SOMT (Semantic Ontology Registrar) holds registration for all 126 cells and all sub-domain bridges. SOMT === Semantic Ontology Registrar (triple-equality, identity-depth lock).
Sub-Domain Naming	Sub-domain naming bridges queries spanning multiple layers. Each cell is a potential Community of Interest (COI) node. COIs can nest into sub-domain COIs down to three levels = GAIA.
CPM / WBS / PERT	Project management scaffolding implicit to every layer. Execution tools for each domain. Not listed in the 7-level cell structure but operative across all 18 layers.
GAIA Link	Global Actuary Investor Authority. Uses 23 Principal Industry Domain Leaders. Every GAIA 'vote' constitutes a global ruling concerning a specific User/GROUP domain. Big Data forms initial Basis for GAIA (AI) rulings. Contingent on WHO, WTO, WIPO.

Element	Canon Note
Five Principle AREAS	Domain AnswerQuestion(s) classified under: ICARA · SECUIR · GUNNYSACK · VERTECA · EARNEDPATH
Calculus Note	$S=E/23(1/x)$ $C=R \times P/M$ $A=C(ME)^{23}$ — governing equations of the PlayNAC/GAIA calculus.

5. Governance Framework

5.1 Level Controls

- Level 1 (Personal) — private self-facing; first tier of inquiry depth
- Level 2 (Public) — community-facing; second tier
- Level 3 (Private) — sealed/Dictum tier; third tier — AnswerQuestion output

5.2 Dictum & AnswerQuestion

AnswerQuestion is dependent on the User/GROUP Dictum rating, which is a function of ABC digital record or biometric confession in the moment. A well-formed answer must relate question context and conform to rules-based assignments leading to output. Layer 18 (MUSIC) provides the coherence measurement that validates whether a Dictum is harmonically grounded or dissonant.

5.3 PlayNAC Game Theory Loop

- User/GROUP poses SEARCH → QUESTION
- SCORE assigned by Dictum rating
- ANSWER returned; CHALLENGE option available
- RESPONSE and final ANSWER logged to Domain Intelligence Stack
- GAIA Vote aggregates User/GROUP Domain rulings at planetary scale
- Layer 18 MUSIC layer provides continuous coherence measurement across the full loop

5.4 NAC EarnedPath Resource Stack

NAC EarnedPath Resource Prime Matter Cybernetics GiantERP CPM WBS PERT — the foundational resource chain operative across all 18 layers, present in the original PlayNAC TABLE root document.

7. Version History

This is a living document. All revisions are logged here. Layer content changes require Canon review by JAS before committing. Label changes require notation of prior label if applicable.

Version	Date	Change Summary
v1.0	June 2026	Canonical lock of 18 Layers × 7 Levels. Layer labels assigned (one-word descriptors). Row 18 MUSIC confirmed as Orbiter/Measurement layer. Music cross-reference at Layer 13 Column 6 noted. Layer 8 = FORCES, Layer 10 = QUERY. 126-cell Talonics lock confirmed.
v1.1	[pending]	[Reserved for next revision — update Layer labels, SOMT registrations, or simulator integration notes here]
