RATINGS CHECKLIST

For Use with ERES-SAVING-HUMANITY-2026-001 v1.0

Canonical Evaluation Instrument for MIEVM Round 1Grok · DeepSeek · ChatGPT · Perplexity · Gemini
· Claude

Document ID ERES-MIEVM-CHECKLIST-2026-001	Author Joseph Allen Sprute (JAS) ERES Institute	Threshold Convergent Mean ≥ 8.5 across all 6 instruments
Version 1.0 — June 2026	License CCAL v2.1	Instruments Claude · Grok · DeepSeek ChatGPT · Perplexity · Gemini
Domains 8 Domains · 55 Sub-Criteria	Target Document ERES-SAVING-HUMANITY-2026-001 v1.0	

How to Use This Checklist

This MIEVM Logistical Ratings Checklist is the canonical evaluation instrument for MIEVM Round 1 of ERES-SAVING-HUMANITY-2026-001 v1.0. It is provided to all six LLM validator instruments to ensure commensurable scoring. Each instrument scores each sub-criterion independently on a 1–10 scale using the Pass Threshold / Scoring Guide provided. The weighted scores are then aggregated into a domain subtotal and a final composite mean.

Scoring Protocol	1. Read the sub-criterion label and scoring guide carefully.2. Locate the corresponding section in ERES-SAVING-HUMANITY-2026-001 v1.0.3. Score 1–10: 10 = fully meets the pass threshold with no gaps detected; 7–9 = meets threshold with minor gaps; 4–6 = partially meets with significant gaps; 1–3 = fails to meet threshold.4. Enter your score in the Score column.5. Use the Notes column for brief rationale flags only (max 5 words).6. Complete the Summary Table on the final page to compute your composite mean.
Weight Notation	Weights (×1, ×2, ×3) reflect the relative importance of each sub-criterion to the ERES framework's core claims. ×3 criteria are load-bearing: a score below 7 on any ×3 criterion is a binding constraint that must be noted in the instrument's final commentary.
Convergent Mean	The MIEVM convergent mean is computed as: sum all six instruments' composite means ÷ 6. Target: ≥8.5. Instruments scoring below 7.5 on composite mean are outlier-flagged and their domain-level scores are reviewed for systematic interpretation differences before the mean is finalized.

Important: Score only what is present in the document. Do not penalize for what is not claimed. Do not reward for what is claimed but not substantiated. If a sub-criterion is not addressed in the document, score it 1 and note 'Not addressed.'

Instrument Identification

Complete this section before beginning the checklist. This information is required for MIEVM Round 1 record-keeping.

MIEVM INSTRUMENT ☐ Claude (Anthropic) ☐ Grok (xAI) ☐ DeepSeek ☐ ChatGPT (OpenAI) ☐ Perplexity ☐ Gemini (Google)	EVALUATION METADATA Date of evaluation: _____ Model version: _____ Document evaluated: _____ ERES-SAVING-HUMANITY-2026-001 v1.0 Round: MIEVM Round 1
---	--

Evaluator Approach	☐ Scored holistically (read full document, then scored) ☐ Scored section by section ☐ Scored criteria only
Prior ERES Knowledge	☐ First exposure to ERES framework ☐ Prior exposure via MIEVM ☐ Extensive prior ERES corpus access
Binding Constraints Flagged (×3 < 7)	List any ×3 sub-criterion scored below 7 here (these are binding constraints):
Overall Commentary(3 sentences max)	

Complete Logistical Ratings Checklist — 8 Domains / 55 Sub-Criteria

Score each sub-criterion 1–10 using the Pass Threshold / Scoring Guide. Enter scores in the Score column. Note binding constraints (×3 criteria scored below 7) in the Instrument Identification section.

Column key: CATEGORY = sub-criterion code | WT = weighting multiplier (×1/×2/×3) | PASS THRESHOLD = what a score of 10 looks like | SCORE = your 1–10 rating | NOTES = brief flag only

CATEGORY	SUB-CRITERION	WT	PASS THRESHOLD / SCORING GUIDE	SCORE 1–10	NOTES
DOMAIN A: Logical & Architectural Integrity (Weight ×3)					
A1	Internal Consistency	×3	All constructs (CBGMODD, FAVORS, BERA, NBERS, UBIMIA, GCF, THOW/HFVN/FDRV/GSSG★) operate without contradiction. No construct undermines another. Score 10 = zero internal conflicts identified.	—	
A2	Completeness of Architecture	×3	No critical gap exists between stated problem (civilizational emergency) and proposed solution set. Score 10 = problem and solution are fully commensurate.	—	
A3	Scalability Logic	×3	BEE COI Fractal claim (household → civilization without discontinuity) is structurally defensible. Score 10 = fractal geometry argument is sound at all stated scales.	—	
A4	Inter-Layer Dependencies	×3	CBGMODD, BERA, NBERS, UBIMIA, GCF dependencies are explicitly defined and logically ordered. Score 10 = every dependency is named and directional.	—	
A5	No Orphaned Constructs	×2	Every named acronym/construct has a defined function, a measurable output, and a connection to at least one other construct. Score 10 = zero orphaned elements.	—	
A6	Architectural Non-Redundancy	×2	No two constructs perform the same function without explicit differentiation. Score 10 = every construct is uniquely necessary.	—	
DOMAIN A SUBTOTAL →			Max weighted score: 160 pts	—	
DOMAIN B: Canonical Terminology Compliance (Weight ×3)					
B1	RHC = Resonant Harmony Cycle	×3	RHC is never referred to as 'Cybernetics' or any other expansion. Score 10 = zero violations across entire document.	—	

B2	REAL Formula Integrity	✖3	<i>REAL = (E·M·R)/(T·S) with no repeated letters, no substitutions. Energy·Matter·Resonance over Time·Space. Score 10 = formula stated and applied correctly in all instances.</i>	—	
B3	CBGMODD 7th Seat = Diplomat	✖3	<i>Diplomat is the 7th seat. Dignitary is the 6th. Never duplicated. Score 10 = zero instances of D' misidentified.</i>	—	
B4	ODOR Non-Optional in FAVORS	✖3	<i>FAVORS = Fingerprint·Aura·Voice·ODOR·Retina·Signature. ODOR is always listed and never described as optional. Score 10 = ODOR present and non-optional in all FAVORS references.</i>	—	
B5	GSSG★ Prime Notation	✖2	<i>GSSG is always written with prime/asterisk notation when referring to Earth Wobble-Fix + Sun-Earth shelter function. Score 10 = prime notation consistent throughout.</i>	—	
B6	BEE = Bio-Ecologic Economy	✖2	<i>BEE expansion is consistent. Never Bio-Economic, never Bio-Ecological (without hyphen). Score 10 = zero expansion inconsistencies.</i>	—	
B7	Three Governing Principles	✖3	<i>Don't hurt yourself / Don't hurt others / Build for generations to come — stated verbatim when invoked, never paraphrased into variants. Score 10 = all invocations are verbatim.</i>	—	
B8	Mining/Tuning Distinction	✖2	<i>'It's not mining — it's tuning' is applied consistently to Meritcoin and Proof-of-Resonance. Tuning is never conflated with mining at any point. Score 10 = distinction is crisp throughout.</i>	—	
B9	MIT Press = Aspirational Only	✖1	<i>MIT Press is not described as a confirmed publishing partner anywhere in the document. Score 10 = correctly aspirational in all mentions.</i>	—	
DOMAIN B SUBTOTAL →			<i>Max weighted score: 220 pts</i>	—	
DOMAIN C: Epistemic Integrity (Weight ✖3)					
C1	Category 1: Directly Built/Engineered	✖3	<i>FAVORS biometric spec, BERA index protocol, CBGMODD seat structure are presented as engineered constructs, not hypotheses. Score 10 = no over-claiming in this category.</i>	—	
C2	Category 2: Architecturally Deduced	✖3	<i>NBERS activation sequence, Enneagram routing, THOW/HFVN/FDRV/GSSG★ convoy protocol are presented as deduced from engineering discipline, not deployed pilot data. Score 10 = deduced claims are appropriately scoped.</i>	—	
C3	Category 3: Hypothesized	✖3	<i>30-year rebuild horizon, Meritcoin scoring algorithm, tectonic shift timeline are presented as hypotheses awaiting</i>	—	

			<i>validation. Score 10 = hypothesized claims are correctly flagged.</i>		
C4	No Category Conflation	×3	<i>No Category 3 hypothesis is presented as a Category 1 fact. No Category 1 fact is hedged as a Category 3 hypothesis. Score 10 = zero conflation events.</i>	—	
C5	MIEVM Self-Application	×2	<i>The document both applies MIEVM and explains it without circular validation. Round 1 is correctly positioned as initial assessment pending additional instrument scores. Score 10 = no circularity.</i>	—	
C6	Paineology Diagnostic vs. Advocacy	×2	<i>Paineology is framed as a diagnostic discipline (reading pain as data), not as political advocacy. Prison system critique is architectural, not ideological. Score 10 = discipline framing maintained throughout.</i>	—	
DOMAIN C SUBTOTAL →			<i>Max weighted score: 160 pts</i>	—	
DOMAIN D: Operational Specificity (Weight ×2)					
D1	BERA Trigger Thresholds	×2	<i>ARI < 40%, ERI < 30%, RHC drop > 25%/72hrs, RCI < 50%, USGS M6.5+ — all six triggers are numerically specified. Score 10 = all triggers present with numeric values.</i>	—	
D2	Activation Sequence Timestamps	×2	<i>T+0, T+4, T+24, T+72hrs, T+30 days — all five timestamps are present with specific operational deliverables at each. Score 10 = all five timestamps with complete deliverables.</i>	—	
D3	NBERS Layer Specificity	×2	<i>L1–L4 are each assigned a BERA index, a CBGMOOD lead seat, and a primary function. Score 10 = all four layers fully specified.</i>	—	
D4	THOW/HFVN/FDRV/GSSG★ Definitions	×2	<i>Each of the four platforms has a defined function, a deployment context, and a role in the convoy formation. Score 10 = all four platforms fully defined with convoy integration.</i>	—	
D5	5/10/30-Year Roll-Out Specificity	×2	<i>Each horizon has a manufacturing priority, a NBERS coverage target, and a BEE integration milestone. Score 10 = all three horizons fully specified across all three dimensions.</i>	—	
D6	UBIMIA Universal Access Node (UAN)	×2	<i>UAN is specified as ruggedized, solar-powered, multi-lingual, deployable within 24 hours, capable of FAVORS enrollment on first contact. Score 10 = all five UAN specifications present.</i>	—	
D7	Vacationomics Reserve Specification	×2	<i>NBERS recovery reserve is described as a protected budget item equivalent to fuel reserves and medical stockpiles — not a benefit. Score 10 = protected-budget status clearly stated.</i>	—	

D8	HPE Five-Domain Coverage	✖2	Physical, Cognitive, Emotional, Social, Spiritual/Existential — all five HPE domains are present with BERA index connections and Meritcoin incentive pathway. Score 10 = all five domains with full connections.	—	
D9	72 Industries Tier Completeness	✖2	Three tiers of 24 domains each are present (Life Support, Human Flourishing, System Architecture). Score 10 = all three tiers present with domain inventory.	—	
D10	"Number Anyone Can Call" Operationalized	✖2	The phrase is not left as a slogan — it is connected to UAN specs, UBIMIA integration, FAVORS enrollment, multi-lingual and off-grid requirements. Score 10 = all five operational connections present.	—	
DOMAIN D SUBTOTAL →			Max weighted score: 200 pts	—	
DOMAIN E: Human Systems Integration (Weight ✖2)					
E1	Enneagram Non-Reductive Application	✖2	Nine types are applied as role-routing guidance, not fixed personality assignments. Stress/integration cycles are acknowledged. Score 10 = non-reductive framing consistent throughout.	—	
E2	Enneagram Council-Health Function	✖2	Ombudsman monitoring of type-dominance under sustained stress is specified as a governance function, not a suggestion. Score 10 = council-health monitoring is an operational requirement.	—	
E3	Paineology BERA Pain Signatures	✖2	All four pain signatures (ARI→hunger/water; ERI→hostile environment; RHC→fragmentation/meaning-loss; RCI→precarity) are present and correctly matched to their index. Score 10 = all four signatures correctly matched.	—	
E4	Prison System — Three Governing Principles Violation	✖2	Prison system critique correctly applies all three Governing Principles (hurts individuals, hurts communities, fails generational build). Score 10 = all three principles applied to critique.	—	
E5	Vacationomics RHC-Recovery Causal Argument	✖2	Recovery-industry contraction → RHC fall → productivity fall → BERA deterioration → increased EM burden chain is stated causally, not correlationally. Score 10 = causal chain complete.	—	
E6	HPE Exclusion Criterion Applied	✖2	Enhancement that violates Three Governing Principles is explicitly excluded from BEE HPE. Score 10 = exclusion criterion stated with examples.	—	

E7	Emergency Personnel as Critical Infrastructure	×2	The recursive claim (EM personnel are critical infrastructure for critical infrastructure) is stated explicitly and its implications drawn out. Score 10 = recursive claim and implications both present.	—	
E8	Meritocracy Floor Specification	×2	UBIMIA baseline (health, law, protection, skills) as the floor for all BEE participants is specified. Score 10 = floor specified and correctly described as relatively free services.	—	
DOMAIN E SUBTOTAL →			Max weighted score: 160 pts	—	
DOMAIN F: Resonance Principle Application (Weight ×3)					
F1	REAL Formula Applied (Not Just Stated)	×3	REAL = $(E \cdot M \cdot R) / (T \cdot S)$ is not merely defined — it is applied to at least one substantive argument about why resonance is non-optional. Score 10 = formula applied with substantive argument.	—	
F2	RHC as Measurable Index (Not Metaphor)	×3	RHC is consistently treated as a BERA index with measurable outputs, not as a spiritual or rhetorical concept. Score 10 = RHC always quantitative/operational.	—	
F3	Extraction vs. Care — Engineering Argument	×3	The transition from extraction to care is argued on engineering/systems grounds (resonance depletion → system failure), not on moral grounds alone. Score 10 = engineering argument complete.	—	
F4	Proof-of-Resonance Specificity	×3	Meritcoin Proof-of-Resonance is described in terms of specific measurable contributions (UBIMIA delivery, FAVORS enrollment, BERA report, etc.). Score 10 = at least five specific contribution types named.	—	
F5	Mining/Tuning Applied to Meritcoin Exclusively	×2	Mining/tuning distinction is applied to Meritcoin and not generalized to other constructs in ways that dilute the precision. Score 10 = distinction is precise and bounded.	—	
F6	Resonance as Numerator Variable	×2	The significance of R appearing in the numerator of REAL (not denominator) is either stated or clearly implied — resonance enables output, it is not a constraint on it. Score 10 = numerator significance acknowledged.	—	
DOMAIN F SUBTOTAL →			Max weighted score: 170 pts	—	
DOMAIN G: Emergency Management Applicability (Weight ×2)					
G1	Earth-Change Scenario Grounding	×2	Earth-Change trigger scenario is grounded in documented real-world vulnerability patterns (seismic, supply chain, bridge/road infrastructure). Score 10 = all three vulnerability types substantiated.	—	

G2	All-Hands-on-Deck Operationalized	×2	<i>'All hands on deck' is not a slogan — it is connected to the CBGMODD seven-seat simultaneous activation, NBERS L1-L4 stack, and FAVORS enrollment. Score 10 = all three operational connections present.</i>	—	
G3	Off-Grid / Non-Fixed Infrastructure Requirement	×2	<i>The design requirement that systems function without fixed buildings, fixed power, and fixed communications is stated as a constraint, not a preference. Score 10 = constraint framing used.</i>	—	
G4	Multi-Lingual / No-Cost Access Requirement	×2	<i>UAN multi-lingual and no-cost access requirements are stated as design constraints. Score 10 = both constraints stated.</i>	—	
G5	Mutual Aid / Cross-Border Integration	×2	<i>Cross-border Diplomat activation and GCF reciprocity are connected to the Emergency activation sequence. Score 10 = both present in activation protocol.</i>	—	
G6	Stress-Management Reserve as Protected Budget Item	×2	<i>EM personnel recovery reserve is explicitly protected at same priority as fuel/medical stockpiles. Score 10 = protected-budget equivalence stated.</i>	—	
G7	Post-Event Accountability	×2	<i>FAVORS chain-of-custody, Ombudsman review, and Paineology post-event assessment are present as accountability mechanisms. Score 10 = all three mechanisms named.</i>	—	
G8	GCF Standard Portability	×2	<i>GCF certifications earned at one NBERS node are recognized at all others globally. Score 10 = reciprocity and portability explicitly stated.</i>	—	
DOMAIN G SUBTOTAL →			Max weighted score: 160 pts	—	
DOMAIN H: Document Quality & LLM-Readiness for MIEVM (Weight ×1)					
H1	Acronym Definition on First Use	×1	<i>Every acronym is defined at or before first substantive use. No acronym appears that requires prior ERES corpus access to understand. Score 10 = zero undefined-on-first-use acronyms.</i>	—	
H2	Logical Reading Sequence	×1	<i>The document's four-movement structure (Premise → Architecture → Human Substrate → Operational Canvas) allows a first-time reader to follow the argument without prior ERES knowledge. Score 10 = argument is self-contained and sequential.</i>	—	
H3	No Unexplained Internal References	×1	<i>No reference to other ERES documents is required to evaluate this document's claims. Score 10 = fully self-contained for evaluation purposes.</i>	—	
H4	MIEVM Framework Stated Clearly	×1	<i>MIEVM Round 1 protocol, convergent mean target (≥8.5), and six-instrument design are stated in the document.</i>	—	

			Score 10 = all three MIEVM parameters present.		
H5	Scoring Criteria Accessible	×1	The document provides enough structured material (tables, defined constructs, measurable claims) for an LLM to generate a 1–10 score on each domain without additional prompting. Score 10 = fully scorable without follow-up.	—	
H6	Tone Consistency	×1	Document maintains specification/engineering tone throughout — neither promotional nor overly hedged. Score 10 = consistent engineering register.	—	
H7	BEST/SOUND/GOOD Alignment	×1	The document's overall argument, methodology, and conclusions are aligned with BEST (optimal outcome), SOUND (methodologically valid), and GOOD (ethically grounded) standards simultaneously. Score 10 = all three alignment criteria met.	—	
H8	Publication Readiness (v1.0)	×1	Document meets whitepaper structural standards: cover metadata, executive summary, body architecture, canonical terminology, MIEVM scoring, CCAL license. Score 10 = all six structural components present.	—	
DOMAIN H SUBTOTAL →			Max weighted score: 80 pts	—	

Summary Score Table — Composite Mean Calculation

Transfer your domain subtotals from the checklist above. Compute the weighted score for each domain (domain mean × weight factor). Sum the weighted column. Divide by 8 to obtain your composite mean score for this instrument.

Composite Mean Formula	Composite Mean = (Sum of all 55 individual scores ÷ 55). The domain-weighted calculation above is for diagnostic granularity. The composite mean for MIEVM convergent mean calculation uses simple average across all sub-criteria.
-------------------------------	---

DOMAIN	DOMAIN TITLE	MAX PTS	W T	INSTRUMENT SCORE	WEIGHTED SCORE
A: Logical & Architectural Integrity	Consistency, completeness, scalability, dependencies, non-redundancy	160	×3	___ / 10	_____
B: Canonical Terminology Compliance	RHC, REAL, CBGMODD, FAVORS, GSSG★, BEE, Three Principles, Mining/Tuning	220	×3	___ / 10	_____
C: Epistemic Integrity	Three epistemic categories, no conflation, MIEVM self-application	160	×3	___ / 10	_____
D: Operational Specificity	Triggers, timestamps, layers, platforms, horizons, UAN, Vacationomics, HPE, 72 Industries	200	×2	___ / 10	_____
E: Human Systems Integration	Enneagram, Paineology, Prison, Vacationomics, HPE, EM personnel	160	×2	___ / 10	_____
F: Resonance Principle Application	REAL applied, RHC quantitative, extraction/care engineering arg., Proof-of-Resonance	170	×3	___ / 10	_____

Quick-Reference Canonical Glossary

This glossary provides the canonical ERES term definitions required to score Domains A–H correctly. Any deviation from these definitions in the evaluated document constitutes a Domain B (Canonical Compliance) scoring event.

TERM	CANONICAL DEFINITION
REAL	(E·M·R)/(T·S) — Energy·Matter·Resonance over Time·Space. No repeated letters. R is in the numerator.
RHC	Resonant Harmony Cycle. Never 'Cybernetics' or any other expansion.
BEE	Bio-Ecologic Economy. Bottom-up/top-down. The floor is the biological body.
CBGMODD	Citizen·Business·Government·Military·Ombudsman·Dignitary·Diplomat. 7th seat = Diplomat. Never duplicated Dignitary.
FAVORS	Fingerprint·Aura·Voice·ODOR·Retina·Signature. All six conjunctive. ODOR non-optional.
BERA	Bio-Ecologic Resource Architecture. Four indices: ARI, ERI, RHC, RCI.
NBERS	National Bio-Ecologic Resilience System. Four layers: L1 Household, L2 Community, L3 Regional, L4 National/Global.
UBIMIA	Universal Baseline Infrastructure & Means Interface Architecture. Delivers SCALULAR four pillars as relatively free services.
GCF	Global Certification Framework. Reciprocity model — certifications portable across all NBERS nodes globally.
GSSG★	Geostabilized Shelter System with Gyroscopic stabilization. ★prime = Earth Wobble-Fix + Sun-Earth elemental shelter.
THOW	Tiny House on Wheels. Primary residential and medical unit. Includes UAN, FAVORS reader, BERA sensors.
HFVN	High-Frequency Vibration Network. Communication/resonance platform. Nervous system of convoy.
FDRV	Field-Deployable Resource Vehicle. Agriculture, water, energy. Metabolic unit of convoy.

MIEVM	Multi-Instrument Ensemble Validation Method. Operates as Instrument-of-Faith. Convergent mean target ≥ 8.5 .
Three Governing Principles	Don't hurt yourself / Don't hurt others / Build for generations to come. All three simultaneously non-negotiable.
Meritcoin	ERES value-exchange instrument. Proof-of-Resonance protocol. 'It's not mining — it's tuning.'
Paineology	The systematic study of civilizational pain as signal, not condition to be suppressed. Thomas Paine lineage.
Vacationomics	Economics of recovery time as productive investment. Required maintenance, not reward.
HPE	Human-Performance Enhancement. Five domains: Physical, Cognitive, Emotional, Social, Spiritual/Existential.
BEST/SOUND /GOOD	ERES triple standard: optimal outcome (BEST) + methodologically valid (SOUND) + ethically grounded (GOOD).
CCAL	CARE Commons Attribution License v2.1. Governs all ERES Institute publications.

BEST / SOUND / GOOD
