

ERES Session Record — Archive Scrutiny

Keyword: Pellis Next-1 **Date:** 2026-06-21 **Subject file reviewed:** Archive.zip (40 files, incl. 1 nested zip) **Context:** ERES-Pellis spectral bridge collaboration, Track B sequencing

Finding

Archive.zip is not a single curated package — it is four unrelated piles bundled together. Only one is ready to build on.

Bucket 1 — Track B math (KEEP, BUILD ON)

Status: disciplined, self-correcting, ready to inform Track B sequencing. Applies the primitive-testing filter correctly, including against ERES's own prior claims.

- `prong1_psci_hat_bridge_v0.2.md.pdf` — corrected a real sign/aggregation error in Pellis's own source paper (min/inf vs sup, eq. 99–101 vs §2.5)
- `prong2_real_dimensional_consistency_v0.1.md.pdf` — retracted the false "REAL is dimensionless" claim (Talonics §4.4); replaced with honest reference-ratio normalization, explicitly labeled a modeling convention, not a derived necessity
- `distance_Z_primitive_v0.1.md.pdf` — defines $Z(t)$ from Pellis's own stability functional; explicitly marks BSG2/Twin-Messiah connection as untested hypothesis, not a finding
- `veiled_z_gate_v0.1.md.pdf` — derives a containment gate from Petermann-factor divergence at the exceptional point; flags calibration constant as an open placeholder
- `ERES-ZEUS-N(Z)-section.md` / `(.md.pdf)` — bounded normality-defect index; HYPOTHESIZED tier, open items flagged pending Pellis
- `ERES-EXTERNAL-CONSTRAINT-TEST-2026-001 (1).md.pdf` — PASS/FAIL audit ledger; correctly FAILS $JAS \times EMA = 72$ as constructed-not-derived, with repair action
- `ERES-Pellis-Spectral-Bridge-CenterBalance-MATH.md.pdf` — self-states "Not yet packaged for Dr. Stergios Pellis... pending Track B sequencing"

Bucket 2 — Pellis's own papers (REFERENCE ONLY, do not assimilate into ERES corpus)

4 PDFs, ~16MB, confirmed authored by Stergios Pellis (ORCID 0000-0002-7363-8254): *Spectral Collapse as a Universal Mechanism...*, *Predictive Spectral Instability...Fusion Plasmas*, *Multiscale Spectral Fractal Analysis...*, *Universal Function Theory of Morphogenesis...*, *Spectral-Fractal Phase Transitions...Cardiac...*. Copyrighted third-party material — keep as working reference, exclude from any Zenodo/canon deposit.

Bucket 3 — Unrelated work, likely swept in by accident

`ERES_Berggruen_2026_v4_SUBMISSION`, `ERES-TRIFURCATION-WP-2026-001_v1.0`, `ERES-WP-2026-CHAIN-001-v1.1`, `ERES-WP-2026-OSI-001-v1.0`, `The Architecture of Resonance v1.0`, 3× `ERES-SAVING-HUMANITY-BSG2` versions. No connection to the Pellis thread.

Bucket 4 — Junk

- `ERES_Pellis.zip` (nested) — duplicate of the package already delivered to Pellis 2026-06-14
- `ERES-PELLIS_BERA_Protocol_v0.2.1 (1).pdf` — confirmed identical content to `v0.2.1.pdf`, just a different page-layout render (4pp vs 8pp); download-collision artifact
- Three live BERA Protocol versions side by side (v0.1, v0.2, v0.2.1) with no filename signal as to current

Decision

Bucket 1 (7 files) is canon-track-ready. Buckets 2-4 excluded from any forward packaging, deposit, or corpus assimilation.
