| <b>Vertical names — v1.1 changes</b>                     | Four vertical descriptor names revised following full 126-cell audit. Changes: GROUND→BODY (V1), LINK→BOND (V2), STRUCTURE→FORM (V3), FORCE→VITAL (V5). Prior names deprecated (not deleted) — version history carries full reasoning. Score improvement: 8.8 composite (v1.0) → 9.2 composite (v1.1). |
| <b>Locked verticals</b>                                  | CONTRACT (V4, 9.5/10), COMPOSITION (V6, 8.8/10), and EVOLUTION (V7, 9.2/10) unchanged. V6 and V7 carry self-referential canonical locks: L18V6 = Composition, L9V7 = Evolution.                                                                                                                        |
| <b>Canonical vertical sequence</b>                       | BODY · BOND · FORM · CONTRACT · VITAL · COMPOSITION · EVOLUTION — reads as a complete civilizational arc: embodied origin → relational binding → structural organization → covenantal agreement → life-force → epistemic creation → recursive becoming.                                                |
| <b>Content flag — L11 COMMONS V2 and V6 both = 'Use'</b> | Duplication within same layer weakens both BOND (V2) and COMPOSITION (V6). This is a content flag for separate canon review by JAS. No keyword changes made in this version — naming-only revision.                                                                                                    |
| <b>Layer 17 — INPUT</b>                                  | Runtime gateway only. Not pre-locked. Level 1 = Question, Level 2 = Answer, Level 3 = Dictum. All seven cells read 'Keyword' — User/GROUP assigned at session time.                                                                                                                                    |

|                             |                                                                                                                                                                                                                                                                                                                              |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Layer 18 — MUSIC (Orbiter)  | Measurement layer. Reads all 17 layers above as signal. NOT a content layer — it is the coherence measurement architecture for any Dictum produced at Layer 17. Distinct from Music at L13V6 (Liberal Arts / Quadrivium).                                                                                                    |
| 126 cells = Talonics Matrix | $18 \times 7 = 126$ = exact cell count of the Talonics Complete Symbol Matrix. Keyable via Talonics 5-Finger Instrument. SOMT (Semantic Ontology Registrar) holds registration for all 126 cells and all sub-domain bridges.                                                                                                 |
| Diagonal classes            | Resonance diagonal (■): Water→Connect→Collaborate→Nation→Class→Administrative→Application — arc of civilizational materialization. Correction diagonal (■): arc of remediation ascending via Music Orbiter. Talonics traversal diagonals (modular wrap): 7 chains of 18 cells each — 5-Finger Instrument navigational paths. |

Version History

| Version | Date         | Change Summary                                                                                                                                                                    |
|---------|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| v1.0    | June 2, 2026 | Canonical lock of 18 Layers × 7 Levels. Layer labels assigned. Row 18 MUSIC confirmed as Orbiter. 126-cell Talonics lock confirmed. Vertical names: GROUND · LINK · STRUCTURE · C |
| v1.1    | June 3, 2026 | Full 126-cell vertical audit. Four vertical descriptor names revised following scored notation review: GROUND→BODY · LINK→BOND · STRUCTURE→FORM · FORCE→VITAL. CONTR              |
| v1.2    | [pending]    | Reserved — L11 COMMONS 'Use' duplication content review. Levels 4–7 governance tier definitions pending JAS canon lock.                                                           |

$$C = R \times P / M \cdot REAL = (E \cdot M \cdot R) / (T \cdot S) \cdot S = E / 23(1/x) \cdot BODY \cdot BOND \cdot FORM \cdot CONTRACT \cdot VITAL \cdot COMPOSITION \cdot EVOLUTION$$
