

# The PlayNAC Architecture Dictum

## A Formal Statement of the Relationship Between the ERES Trilogy, the UBIMIA Monograph, and the ERES Library

### Abstract

This paper formalizes the PlayNAC Architecture Dictum: **PlayNAC  $\equiv$  (ERES Trilogy  $\times$  ERES UBIMIA Monograph) + ERES Library (600+ documents)**. The dictum is short to state and load-bearing in consequence: it specifies the canonical relationship among the three primary corpora produced by the ERES Institute since February 2012, and it tells future readers — including prospective publishers, peer reviewers, and downstream implementers — exactly where any single ERES artifact sits within the larger architecture. The dictum is not a catalog; it is an algebraic statement about how the three corpora compose into a single operational system, PlayNAC, the New Age Cybernetics game-platform that operationalizes the Institute's research output for participatory governance, education, and economy.

**Keywords:** PlayNAC, ERES Trilogy, UBIMIA, New Age Cybernetics, architectural dictum, ERES Library, governance platform, ERES Institute.

### 1. Introduction

The ERES Institute has, since February 2012, produced research output across three distinguishable corpora:

1. **The ERES Trilogy** — three foundational books synthesizing the Institute's theoretical core (target publisher: MIT Press, aspirational).
2. **The ERES UBIMIA Monograph** — operational and protocol-level documentation, instantiated most recently as the ERES UBIMIA Manual v1.1 (April 25, 2026, 188 pages).
3. **The ERES Library** — the running archive of whitepapers, executive orders, equation derivations, covenant documents, ResearchGate deposits, and protocol specifications, presently exceeding 600 documents.

Until this paper, the relationship among the three was left implicit — readers inferred it from context. The PlayNAC Architecture Dictum makes the relationship explicit and binding.

## 2. The Dictum

**PlayNAC  $\equiv$  (ERES Trilogy  $\times$  ERES UBIMIA Monograph)  $+$  ERES Library**

The notation is read as follows:

- $\equiv$  — definitional identity, not approximate equality. PlayNAC *is* the right-hand side; it is not merely modeled by it.
- $\times$  — compositional product. The Trilogy and the Monograph are not additive; they are co-determinative. The Trilogy without the Monograph is theory without operationalization; the Monograph without the Trilogy is protocol without epistemic ground.
- $+$  — additive extension. The Library extends the product but does not change its identity. New Library entries enrich PlayNAC without redefining it.

## 3. Why Each Term Is Necessary

**3.1 Why the Trilogy.** The Trilogy carries the Institute's theoretical commitments: New Age Cybernetics, the 72 Key Domains, the Triune Math keys, the Twin Messiah construct (JAS  $\times$  EMA = 72, with DAL as hinge), and the moral vectoring of the epistemology toward BEST/SOUND/GOOD outcomes. Without the Trilogy, downstream readers cannot reconstruct *why* the protocols are shaped as they are.

**3.2 Why the Monograph.** The UBIMIA Monograph carries the operational commitments: how Universal Basic Income, Merit, Investment, and Awards (UBIMIA) are computed, attested, distributed, and audited. The Monograph is what makes the Trilogy's theory implementable rather than merely admirable. Without the Monograph, the Trilogy's theoretical commitments cannot translate into participatory practice.

**3.3 Why the Library.** The Library carries everything that does not fit the Trilogy/Monograph rhythm: the Berggruen Prize Essay, the DOFA whitepapers, the Hague filing, the Equity Covenant, EAAP versions, the Capstone Heptad, the cryptographic primitive papers, executive order drafts, and the ongoing ResearchGate deposit stream. The Library is where the Institute's living research happens. Without the Library, PlayNAC would be a closed system; with it, PlayNAC remains an open and evolving one.

## 4. What the Dictum Forbids

The dictum forbids three common misreadings:

**4.1 Misreading as catalog.** The dictum is not a list. A reader who has read all three corpora has not thereby "completed PlayNAC"; PlayNAC is the *composition*, not the union of pages.

**4.2 Misreading as substitution.** No corpus substitutes for another. A practitioner cannot operate PlayNAC from the Library alone, however large the Library grows; the Trilogy and the Monograph are constitutive, not merely informative.

**4.3 Misreading as hierarchy.** The product Trilogy  $\times$  Monograph is symmetric. Neither corpus is superior to the other; their co-determination is the whole point.

## 5. PlayNAC as the Operational Game-Platform

PlayNAC — Play New Age Cybernetics — is the participatory game-platform that brings the dictum's right-hand side into lived practice. Players (citizens, students, council seats, attestors)

interact with PlayNAC through:

- **The 72 Key Domains** — the upper bound on simultaneous decision surfaces, derived from the gematria value of "Joseph Allen Sprute" and culled from the Register of Collective Indices during pre-1997 Global\_VPN work.
- **BERA-driven feedback** — Behavioral and Environmental Resonance Audit metrics (ARI, ERI, RHC, RCI) that score participation and feed Meritcoin Proof-of-Resonance.
- **The seven-seat CBGMODD Council** — the governance body whose authority engages under  $R_2$  (Reach) of the EAAP-mediated attestations.
- **The IDIPITIS principle** — that not all knowledge is concurrently disclosed knowledge, formally accommodated at the cryptographic layer by the VEILED state.
- **SCALULAR services** — HEALTH/SSHP, LAW/SSLA, PROTECTION/SSPS, SKILLS\_TRADE/SSST — delivered "relatively free" via UBIMIA.

PlayNAC is not a metaphor for these systems; PlayNAC *is* the integrated operating surface on which the systems become a single coherent practice.

## 6. Position Relative to MIT Press and the Aspirational Publication Path

MIT Press is the aspirational publisher for the ERES Trilogy. The dictum does not depend on that aspiration being met. If the Trilogy is published by MIT Press, the dictum stands; if it is published elsewhere or self-published under CCAL v2.1, the dictum stands. The dictum binds the *composition* of corpora, not their imprint.

## 7. The Library as Closed-Loop Witness

A Library entry is, in the dictum's terms, a *witness*: a deposit that documents PlayNAC operating under specific conditions. ResearchGate deposits — slot 431 (Cryptographic Stack Primitive v1.3), slot 432 (EAAP v1.2), slot 433 (this paper), and the more than 430 prior entries — are the public ledger of that witnessing. The Library's growth is not entropic; it is the structural artifact of an architecture functioning as designed.

## 8. Conclusion

The PlayNAC Architecture Dictum is now formally on the record. Future readers of any single ERES document — a whitepaper, a covenant, a protocol specification, a primitive paper — can locate that document in the architecture by asking three questions: (1) Is this constitutive of theory? Then it belongs to the Trilogy term. (2) Is this constitutive of operation? Then it belongs to the Monograph term. (3) Is this a witnessing deposit? Then it belongs to the Library term. With the dictum in hand, the answer is reliable, and PlayNAC's architectural integrity becomes inspectable rather than merely asserted.
