

JOSEPH ALLEN SPRUTE

Global Systems Architect | Cybernetic Governance | Humanitarian Framework Design
Bella Vista, Arkansas, USA • eresmaestro@gmail.com • ORCID 0000-0001-9946-3221
ResearchGate (424+ publications) • GitHub: ERES Institute for New Age Cybernetics

PROFILE

International systems architect and founder of the ERES Institute for New Age Cybernetics, specializing in governance design, digital identity, AI verification, and humanitarian economic frameworks. Fourteen years of continuous open-access research spanning biometric resonance metrics, multi-stakeholder governance models, long-horizon sustainability planning, and privacy-forward cryptographic attestation. Published globally in eight languages; work used across academic, NGO, and cross-sovereign dialogue contexts.

CORE COMPETENCIES

- Governance & Policy Architecture
- Digital Identity & Privacy
- AI Verification & Cross-Platform Validation (MIEVM)
- Humanitarian Economic Frameworks (UBIMIA)
- Conflict & Continuity Planning
- Cryptographic Attestation (EAAP v1.3)
- Multi-Language Briefing Development
- Standards, Documentation & Open Licensing (CCAL v2.1)

KEY CONTRIBUTIONS

MIEVM — Multi-Instrument Ensemble Validation Method

Cross-LLM methodology supporting accountability, transparency, and bias-resistant decision structures.

UBIMIA Economic Framework (v1.1)

188-page operational model linking identity, economic stability, and family-support mechanisms.

ERES Cryptographic Stack & Attestation Protocol (v1.3)

Privacy-preserving identity assurance architecture suitable for NGO, governance, and rights-protection contexts.

Resonance Biometric Suite (ARI, ERI, RHC, RCI)

Non-invasive multi-index identity system aligned with humanitarian privacy requirements.

1000-Year Future Map & ERES Equity Covenant

Long-term governance and sustainability tools relevant to planetary resilience and global civil-society planning.

PROFESSIONAL EXPERIENCE

Founder & Director

ERES Institute for New Age Cybernetics

2012 – Present | USA

- Lead architect of 400+ open-access research works on cybernetics, governance, and humanitarian systems
- Developed multilingual government-partnership briefs (English, Chinese, Arabic, Japanese, Spanish, etc.)
- Designed cryptographic and biometric identity tools aligned with rights-preserving humanitarian deployment
- Authored global governance documents including the ERES Trilogy and Equity Covenant
- Established CARE Commons Attribution License (CCAL v2.1) for global public-benefit reuse

Founder, SaleBuilders

2007 – 2012

Developed systems-ontology and information architectures foundational to later governance frameworks.

Lead Architect, CyberRAVE

1997-2007

Originated the 72 Key Domains—an early cybernetic classification system informing MIEVM and ERES epistemology.

MILITARY BACKGROUND

U.S. Army — Oregon Army National Guard, Infantry (11B)

1983 – 1989 • Specialist E-4 • Expert Weapons Qualification • Dragon Gunner • Honorable Discharge

SELECTED GLOBAL OUTPUTS

- 424+ publications on ResearchGate
- Multilingual NGO/government briefs (8 languages)
- Cross-Pacific co-authorship (Tatung University, Taiwan)
- Hague-filed governance proposals (March 2026)
- Multi-version AI Governance Papers (v1–v3)
- Planetary resilience frameworks (VLSA, Sixth Extinction Mandate)

LANGUAGE & LICENSING

English (native)

All research distributed under the CARE Commons Attribution License v2.1 (CCAL) for humanitarian, academic, and governmental use.
