

INTERNATIONAL NGO RESUME — JOSEPH ALLEN SPRUTE

Global Systems Architect | Cybernetic Governance | Constitutional Engineering | AI Verification |
Human-Rights–Aligned Framework Design

Location: Bella Vista, Arkansas, USA
Email: eresmaestro@gmail.com
ORCID: 0000-0001-9946-3221
ResearchGate: 424+ publications
GitHub: ERES Institute for New Age Cybernetics

GLOBAL PROFILE

International multi-domain systems architect and founder of the ERES Institute for New Age Cybernetics, producing fourteen consecutive years of research across cybernetic governance, cryptographic identity, biometric resonance science, humanitarian-systems architecture, and multi-sovereign institutional frameworks.

Author of the MIEVM cross-LLM verification method, the ERES Cryptographic Stack, and the UBIMIA economic framework, with documented collaborations spanning the United States, Taiwan, Europe, and broader international audiences. Published in eight languages; outputs distributed under the CARE Commons Attribution License (CCAL v2.1) for global public benefit.

Strong alignment with NGO mandates including transparency, identity protection, digital-rights policy, climate governance, conflict-sensitive system design, and long-horizon civilizational planning.

INTERNATIONAL COMPETENCIES

- Governance & Policy Architecture

Constitutional engineering, seven-stakeholder governance model (CBGMODD), Department of Family Amity (DOFA), Hague-filed proposals

- Human-Rights–Aligned Digital Identity

Biometric resonance indices (ARI, ERI, RHC, RCI), privacy-forward attestation, post-quantum migration models

- AI Governance & Verification

Multi-platform validation (MIEVM), semantic-culling epistemology, AI governance papers (v1–v3)

- Sustainable Development Systems

UBIMIA economic framework, Patriot Dividend model, global family-support architecture

- Conflict Mitigation & Continuity Planning

Long-horizon 1000-Year Future Map, Continuity Index methodologies, community-stability modeling

- Open-Standard Documentation & Global Access

188-page operational manuals, multi-language briefs, public licensing frameworks, civilizational transparency tools

WORK OF GLOBAL SIGNIFICANCE

MIEVM — Multi-Instrument Ensemble Validation Method

Cross-LLM verification method designed to produce agreement signals across parallel reasoning systems. Applied to governance, AI safety, and cross-cultural policy briefs.

ERES UBIMIA Manual (v1.1)

188-page operational economic-humanitarian blueprint integrating biometric identity, incentives, family stability, and multi-sector governance.

ERES Trilogy (Three-Volume Corpus)

A foundational architecture linking:

- identity clarity
- equitable economic structure
- data integrity and institutional trust

ERES Cryptographic Stack & EAAP Attestation Protocol (v1.3)

Global public-good specification supporting identity assurance and anti-corruption requirements in humanitarian or conflict-sensitive terrains.

BERA & Resonance Indices (ARI, ERI, RHC, RCI)

Ethically anchored biometric frameworks with non-invasive resonance metrics suited for privacy-preserving identity verification in refugee, aid, and cross-border contexts.

1000-Year Future Map & ERES Equity Covenant

Long-term governance-planning instruments for planetary stewardship, climate resilience, and institutional continuity.

PROFESSIONAL EXPERIENCE

Founder & Director

ERES Institute for New Age Cybernetics

2012 – Present | USA

- Lead architect of 400+ open-access research documents in cybernetics, humanitarian economics, identity systems, and governance design
- Created multilingual government-briefing packets for cross-cultural distribution
- Developed privacy-preserving cryptographic identity systems (BERA, FAVORS, EAAP v1.3)
- Designed economic frameworks for post-conflict reconstruction, family stability, and intergenerational equity
- Established CARE Commons Attribution License (CCAL v2.1) for public-benefit institutional transparency

Founder

SaleBuilders

2007 – 2012

- Early systems-ontology work later incorporated into global governance models
- Built digital ecosystems supporting cross-sector coordination, information resilience, and institutional capacity

Lead Architect

CyberRAVE

1997-2007

- Originated the 72 Key Domains as an early cybernetic classification system
- Developed constraint-based analytical methods foundational to MIEVM

MILITARY BACKGROUND

U.S. Army, Oregon Army National Guard (11B Infantry)
1983 – 1989

- Expert Weapons Qualification
- Dragon Gunner
- Honorable Discharge
- Applied military discipline to institutional resilience, conflict-scenario modeling, and humanitarian-risk assessment

SELECTED INTERNATIONAL OUTPUTS

- 424+ publications under ORCID (open-access)
- Multilingual government partnership briefs (English, Chinese, Japanese, Russian, Indonesian, Arabic, German, Spanish)
- Cross-Pacific co-authorship: Tatung University, Taiwan
- Hague-filed governance proposals (March 2026)
- ERES TERMS series (47 issues) documenting global ethical principles
- Global sustainability frameworks: VLSA, Sixth Extinction Mandate, Planetary Collision Avoidance Framework

LANGUAGES

- English — Native
- Global distribution of work in eight languages (via translation partners)

LICENSE & PUBLIC INTEREST COMMITMENT

All research and frameworks published under the CARE Commons Attribution License v2.1 (CCAL) for humanitarian, academic, and governmental reuse.
