

WHAT I ACTUALLY NEED

Role Tracking – One Page

Date: May 2026 | Status: Open | License: CCAL v2.1

THE ROLES (In Order of Priority)

#	Role	What They Do	What They Do NOT Do	Status
1	Money Handler (Steward)	Receive funds. Pay bills. Handle fiscal sponsorship. Never ask "how much does this cost."	Touch the architecture. Become a technical expert.	☐ Open

2	Door Opener	Make one introduction. Say "I know someone who should look at this."	Implement anything. Do the work for me.	☐ Open
---	-------------	--	---	-------------------------------

3	Legal / Publisher Liaison	Review open-source license. Handle publisher contracts for the Trilogy.	Become my lawyer. Work for free.	☐ Open
---	---------------------------------	---	----------------------------------	-------------------------------

4	Pilot Implementer	Run the technical deployment. Manage developers. Report to me on architecture needs.	Handle money. Make policy decisions.	☐ Open
---	----------------------	--	---	-------------------------------

5	Developers (2)	Build semantic search. Build simulation engine. Follow my technical specs.	Work for free. Design the architecture.	☐ Open
---	----------------	--	---	-------------------------------

6	Civic Partner	Sign MOU for pilot jurisdiction. Provide sandbox environment.	Fund the pilot alone. Become the implementation team.	☐ Open
---	---------------	---	---	-------------------------------

7	Advisory Board Member	Attend quarterly calls. Provide strategic guidance. Open networks.	Manage operations. Handle money.	☐ Open
---	-----------------------	--	----------------------------------	-------------------------------

THE DEAL FOR EACH ROLE

Role 1: Money Handler (Steward)

License: CCAL v2.1, May 2026

"You handle money. I never see it. You pay bills. I never ask. You send one sentence quarterly: 'Balance X. Spent Y.' That is the job."

Time: 2-4 hours/month

Risk: None (funds pass through fiscal sponsor)

Return: Credit as Steward. First-mover position. No equity.

Role 2: Door Opener

"You know someone. You make one introduction. You say: 'Talk to Joseph.' That is the job. You do not need to understand ERES."

Time: 15 minutes

Risk: None

Return: Gratitude. Credit if desired.

Role 3: Legal / Publisher Liaison

"You have a legal team or a publisher contact. You say: 'Review this one-page license.' That is the job. I do the rest."

Time: 1-2 hours

Risk: None (review only, no signing unless agreed)

Return: Credit. First access to the Trilogy.

Role 4: Pilot Implementer

"You run the deployment. You manage the developers. You report to me on architecture needs. You do NOT handle money – the Steward does that."

Time: 10-20 hours/week during pilot (3-6 months)

Risk: Technical (software deployment risk, not financial)

Return: Co-ownership of pilot results. Published case study co-author. Credit.

Role 5: Developers (2)

"You build what I specify. Semantic search. Simulation engine. Query interface. You follow the technical whitepaper. You do NOT design the architecture."

Time: 10-20 hours/week

Compensation: Paid by Steward (hourly or contract)

Return: Salary. Credit in technical documentation. Open-source contribution record.

Role 6: Civic Partner

"You provide a sandbox. A municipality. A cooperative. A corporate internal environment. You say: 'Test ERES here.' You do NOT fund the entire pilot alone."

Time: Minimal (MOU signature, quarterly check-in)

Risk: Reputational (if pilot fails)

Return: First-mover positioning. Published case study co-author.

Role 7: Advisory Board Member

*"You attend four calls per year. You open your network. You say 'have you considered X?'
You do NOT manage operations or handle money."*

Time: 4-8 hours/year
Risk: None
Return: Credit. Strategic influence. First access.

WHAT I CAN DO

I Can	I Cannot
Write the architecture	Handle money
Provide technical specs	Implement a pilot alone
Produce evidence and publications	Be the door opener AND the implementer

Train developers on the vision

Pay developers

Advise on legal and publisher strategy

Sign contracts or negotiate

WHAT I NEED FROM YOU (Whoever You Are)

If you are one person: Take one role. That is enough.

If you are an organization: Assign different people to different roles. Tell me who does what.

If you cannot take a role: Name one person who can. That is also enough.

THE BOTTOM LINE

"I built the architecture. I cannot handle money. I cannot implement a pilot alone. I need seven roles filled. You do not need to fill all of them. Fill one. Name someone for another. That is how this gets built."

YOU SAID YES – NOW WHAT?

Role-Based Checklist – One Page

Date: May 2026 | License: CCAL v2.1

IF YOU ARE THE MONEY HANDLER (STEWARD)

You said: *"I handle money. Joseph never sees it."*

Step	Action	Time
1	Choose a fiscal sponsorship vehicle (Open Collective, 501(c)(3), or corporate restricted fund)	1-2 hours
2	Send Joseph: <i>"I have chosen [vehicle]. Send me your monthly number and first invoice."</i>	5 minutes
3	Receive Joseph's number. Double it for safety. Set up monthly payment schedule.	30 minutes
4	Pay bills as they arrive. Do not ask Joseph "how much does this cost."	15 min/month

5	Once per quarter, send Joseph: <i>"Balance X. Spent Y. No action needed."</i>	5 minutes
6	If you cannot continue, give 30 days notice. Name one potential successor.	5 minutes

You are done. That is the entire job.

IF YOU ARE THE DOOR OPENER

You said: *"I know someone who should look at this."*

Step	Action	Time
1	Identify one person in your network. Do not overthink.	5 minutes
2	Send them: <i>"Talk to Joseph. He built something you should see. I cannot explain it. Just talk to him."</i>	5 minutes
3	Copy Joseph on the message or let him know who to expect.	2 minutes
4	You are done. No follow-up required unless you want to.	–

That is it. One introduction. You do not need to understand ERES.

IF YOU ARE THE LEGAL / PUBLISHER LIAISON

You said: *"I have a legal team or a publisher contact."*

Step	Action	Time
1	Send Joseph: <i>"Here is the contact. Here is how to reach them. Use my name."</i>	5 minutes
2	OR: Review the ERES Open Publication License (CCAL v2.1) yourself. Send Joseph any questions.	1-2 hours
3	If publisher: Forward Joseph's Trilogy prospectus to your contact. Say: <i>"This is worth a look."</i>	10 minutes
4	If legal: Confirm the license is usable. Say: <i>"No red flags."</i> OR <i>"Change X before signing."</i>	1-2 hours

You do not need to become Joseph's lawyer. You just need to open the door or give a quick review.

IF YOU ARE THE PILOT IMPLEMENTER

You said: *"I will run the deployment. Joseph builds. I implement."*

Step	Action	Time
------	--------	------

1	Read the VERTECA PlayNAC Whitepaper (30 pages). Highlight what you do not understand.	2-3 hours
2	Schedule a 1-hour call with Joseph. Ask your questions. Get technical specs.	1 hour
3	Identify developer hiring needs. Send specs to Steward for budget approval.	2-3 hours
4	Hire 1-2 developers (Joseph will interview, you handle paperwork and payments).	5-10 hours
5	Run weekly standups with developers. Report to Joseph weekly on architecture needs.	2-4 hours/week
6	Do not handle money. Do not ask Joseph for budget decisions. Steward handles that.	–

You are the bridge between Joseph's architecture and the developers. You do not design. You implement.

IF YOU ARE A DEVELOPER (2)

You said: *"I will build what Joseph specifies."*

Step	Action	Time
1	Read the VERTECA PlayNAC Whitepaper and the technical specifications in the UBIMIA Manual.	4-6 hours
2	Schedule a 30-minute call with Joseph. Get your first assignment.	30 minutes
3	Build. Ask Joseph questions as they arise. Do not redesign the architecture.	10-20 hours/week
4	Submit invoices to Steward (not to Joseph). Steward pays.	5 min/week
5	Push code to GitHub. Joseph reviews. Iterate.	Ongoing

You are paid by Steward. You report to Pilot Implementer (if exists) or directly to Joseph. You do not handle money.

IF YOU ARE THE CIVIC PARTNER

You said: *"You can test ERES here. We provide the sandbox."*

Step	Action	Time
------	--------	------

1	Sign a simple MOU (one page). Joseph will provide template.	30 minutes
2	Designate one internal contact for the pilot.	5 minutes
3	Provide sandbox environment (cloud instance, test data, internal approval).	Varies
4	Let Joseph and Pilot Implementer do the work. You observe.	Minimal
5	Co-author the published case study (optional).	2-4 hours

You do not fund the pilot alone. You do not become the implementation team. You provide the space.

IF YOU ARE AN ADVISORY BOARD MEMBER

You said: *"I will advise. I will open my network."*

Step	Action	Time
1	Schedule a 30-minute onboarding call with Joseph.	30 minutes
2	Attend quarterly calls (4 per year, 1 hour each).	4 hours/year

3	When you hear of an opportunity, forward to Joseph: <i>"Talk to this person."</i>	As needed
---	--	-----------

4	Do not manage operations. Do not handle money. Do not attend weekly standups.	–
---	---	---

That is the job. Strategic. Light touch. High leverage.

IF YOU ARE NOT SURE WHICH ROLE FITS

Do this:

Step	Action
------	--------

1	Send Joseph: <i>"I want to help. I am not sure how. Tell me which role needs filling most right now."</i>
---	---

2	Joseph will answer with one role.
---	-----------------------------------

3	Say yes to that role, or say <i>"not that one, but here is what I can do instead."</i>
---	--

THE BOTTOM LINE

"You said yes. Thank you. Now follow the steps for your role. Do not do someone else's job. Do not ask Joseph about money. Do not redesign the architecture. Just do your role. That is enough."
