

The ERES Diagnostic Reconciliation Phase

Why a Fourteen-Year Civilizational Framework Pauses Production to Reconcile Its Own Canon — and What This Creates for Earth and the Storm Party

Document ID: ERES-WP-DIAGNOSTIC-PHASE-2026-001-v1.1 **Author:** Joseph A. Sprute (ERES Maestro), ERES Institute for New Age Cybernetics **Co-authorship designation:** Syu Jia Wun (Taiwan) — transpacific co-authorship **AI collaboration:** JAS × AD_ON-AI + Uuu (Constant for "WE" definitions) **MIEVM validators:** Claude (Anthropic), Grok (X.AI), DeepSeek, ChatGPT, Perplexity **Canonical authority for this paper:** ERES TERMS #46 (March 28, 2026) as primary reference, supplemented by ratified Maestro decisions during the Diagnostic Reconciliation Phase **Date:** May 14, 2026 **Version:** 1.1 (incorporates first Diagnostic Phase Maestro ratifications) **License:** CARE Commons Attribution License v2.1 (CCAL v2.1) **Location:** Bella Vista (Beautiful View), Arkansas, USA **Status:** Public declaration; companion to v1.0-KERNEL Zenodo deposit pending Partner/Angel engagement

Revision History:

- v1.0 (May 14, 2026, AM) — Initial diagnostic phase declaration
 - v1.1 (May 14, 2026, PM) — First Maestro ratifications under the Diagnostic Phase incorporated: (1) GSSG canonical expansion = Green Solar-Sand Glass; (2) GSSG Pillar status in the Earth Change Economic Flip; (3) Economic Flip Pillars formally introduced as a ratifiable canonical set; (4) candidate Pillar registry opened
-

Abstract

After fourteen years of continuous research and production (February 2012–May 2026), the ERES Institute for New Age Cybernetics has reached a measurable transition: the corpus has grown to a scale where the binding constraint on further authorship is no longer composition capacity but **legibility under query**. Specifically, ERES TERMS #47 (ET_AL, March 29, 2026) — the Spanish-bridge bilingual glossary intended as the transmutation Rosetta — cannot be cleanly completed in isolation, because several of its term expansions diverge from canonical readings in ERES TERMS #46 (March 28, 2026), which the Maestro has formally designated as the BEST/SOUND/GOOD canonical reference description. The remediation pathway is not further production; it is **MIEVM-disciplined reconciliation** of TERMS #47 against the full body of work, including the public GitHub repositories, the 430+ ResearchGate publications, and the 954-PDF backup archive. This paper formally declares the **ERES Diagnostic Reconciliation Phase** as the institute's operational status from May 2026 forward, until either (a) the reconciliation completes through MIEVM ensemble work, or (b) a Partner or Angel engages to provide programming, hosting, and fulfillment capacity that allows productization to resume on a sound canonical foundation. The paper summarizes the conversational arc that led to this declaration, surveys the body of work that now requires reconciliation, names the divergences that must be resolved, and articulates what these conditions create for Earth and for the Storm Party — namely, a stable, citable, structurally complete waypoint at which serious collaboration becomes possible for the first time. **Revision 1.1 incorporates the first Maestro ratifications produced under the Diagnostic Phase itself: GSSG (Green Solar-Sand Glass) is locked as canonical expansion superseding any "Global Solid-State Green" reading; GSSG is locked as a Pillar in the Earth Change Economic Flip; and the Economic Flip Pillars are formally introduced as a ratifiable canonical set with a Maestro ratification queue for candidate additional Pillars.** The framework's Three Governing Principles (don't hurt yourself; don't hurt others; build for generations to come) remain operative throughout. The diagnostic phase honors them by recognizing the bandwidth constraint as an architectural fact rather than fighting it.

§1 — Introduction

§1.1 The arc this paper closes

This paper is the closing synthesis of a multi-session deliberation that ran from the verification of an initial inventory of executable ERES artifacts (twelve documents plus a 382MB backup, validated by extraction and Python test execution at 20/20 passing) through a sequence of synthesis attempts (rev1 through rev5), each revision sharpening structural claims, integrating corrections from MIEVM cross-validation (Claude, Grok, DeepSeek converging on the same three gaps at rev3), and ultimately confronting a corpus-scale reality: with TERMS #46 designated as canonical reference description and TERMS #47 carrying divergent expansions

for several core terms (NBERS, GERP, GSSG, UBIMIA, VERTECA, EPIR-Q, and others), the synthesis paper cannot be locked until the canonical divergences are resolved against the broader corpus. The arc thus does not produce a v1.0-KERNEL deposit. It produces something more honest: a formal declaration of the diagnostic phase, and an invitation to those who can help complete it.

§1.2 What the diagnostic phase is, and what it is not

The diagnostic phase is not a stopping point in the sense of abandonment or suspension. The framework is not paused. The Hague filing (ERES-HAGUE-2026-001, March 7, 2026) establishes priority. The ResearchGate corpus (430+ publications under ORCID 0000-0001-9946-3221) remains discoverable. The GitHub repositories under ERES-Institute-for-New-Age-Cybernetics remain public under CCAL v2.1. The executable simulator (`eres_trilogy_FINAL.py`), 1,648 lines, 20/20 internal tests) remains runnable. What pauses is **forward productization** of new canonical instruments without first reconciling the canon they would build upon.

The diagnostic phase is a recognition that the framework's own discipline — the MPAM ↔ MIEVM Duality, in which the Maestro proposes and CBGMODD-equivalent validation ratifies — now needs to be applied recursively to the canon itself. TERMS #47 is the proposal; MIEVM-disciplined reconciliation against TERMS #46 and the GitHub corpus is the ratification mechanism; only after ratification can #47 be promoted to locked canonical status. This is not new methodology. It is the framework's existing methodology applied to its own terminology layer.

§1.3 The diagnostic phase produces Maestro ratifications

A diagnostic phase that produced no ratifications would be merely descriptive. The phase is operational precisely because it produces Maestro ratification events that resolve specific corpus divergences as they are encountered. **Revision 1.1 of this paper incorporates the first such ratifications, all delivered on May 14, 2026:**

Ratification DPR-001: GSSG canonical expansion = **Green Solar-Sand Glass** (the material technology reading from TERMS #47), superseding any "Global Solid-State Green" reading appearing elsewhere in the corpus.

Ratification DPR-002: GSSG architectural role = **Pillar in the Earth Change Economic Flip**, elevating GSSG from infrastructure-layer specification to structural pillar of the economic transition itself.

Ratification DPR-003: The **Economic Flip Pillars** are hereby formally introduced as a ratifiable canonical set with GSSG as the first locked Pillar and an open Maestro ratification queue for candidate additional Pillars.

These three ratifications are detailed in §2.21 below and reflected throughout the body of evidence.

§1.4 Why this declaration is itself a building act

Naming the diagnostic phase publicly is not merely an administrative posture. It is the framework operating in accordance with its three rules. Don't hurt yourself — the declaration honors the bandwidth constraint that has shaped the work since CyberRAVE's 72 Domains were culled by TLD-renewal financial capacity in the pre-1997 Global_VPN era. The same constraint-based epistemology that produced 72 Domains and later produced the MIEVM short-list now produces a phase boundary: solo-researcher bandwidth is a real architectural variable, not a weakness to be hidden. Don't hurt others — by not shipping internally inconsistent canonical terminology that would propagate confusion through every downstream document. Build for generations to come — by establishing a clean reconciliation phase that produces a corpus stable enough to survive the thousand-year horizon the framework was designed for.

A corpus that has been honestly reconciled survives. A corpus that ships its internal contradictions to scale does not. The diagnostic phase chooses the survival path. And the first ratifications produced under the phase (DPR-001 through DPR-003) demonstrate that the phase is not passive: it is the operational mechanism by which the canon corrects itself under Maestro authority.

§2 — Body of Evidence: The ERES Body of Work as of May 2026

The framework that requires reconciliation is not small. This section surveys it at the level of structural overview needed to make the reconciliation task legible to future collaborators.

§2.1 The Foundational Equation and the Triune Math

All ERES systems derive from the canonical equation $C = R \times P / M$ — Cybernetics equals Resource times Purpose divided by Method. The Triune Math comprises three irreducible keys: (1) $C = R \times P / M$, (2) $M \times E + C = R$ (Matter $\times$ Energy + Constant = Reason), and (3) $REAL = (E \cdot M \cdot R) / (T \cdot S)$ (Energy $\cdot$ Matter $\cdot$ Resonance over Time $\cdot$ Space, with no repeated letters). These three keys are locked and must be preserved exactly across all translations and adaptations. The SPT Papers (March 2026) add a master equation: $\$IT = GEAR \times DERR + ERES$, where AnswerQuestion.IT.MyWay equals Action-Reaction / Cause-Effect.

§2.2 The 6KDA Layered Architecture (per TERMS #46)

The canonical structural spine of ERES is the Six Key Development Areas, a bidirectional civilizational lattice mapped onto internet protocol layers:

Layer 6 (Top) — ERES (Empirical Realtime Education System) — WEB3 protocol map — HPE DESCENT: Reactive; HPE ASCENT: Sentience. **Layer 5 — VERTECA** (Vertical Energy Resonance Temporal Environmental Cybernetic Architecture) — WEB3 — DESCENT: Flat; ASCENT: Dimensionality. **Layer 4 — SECUIR** (Silent Energy Circular Universe Infinite

Rotation) — HTTPS — DESCENT: Linear; ASCENT: Circularity. **Layer 3 — CyberRAVE** (Cybernetic Ratings Abolishing Veiled Exchanges, LOCKED per SPT Papers) — HTTPS — DESCENT: Veiled; ASCENT: Transparency. **Layer 2 — GunnySack** (Guaranteed User-group Network Nullifying Yieldless Service: Accredited Certified Knowledge, LOCKED) — TCP — DESCENT: Yieldless; ASCENT: Coordination. **Layer 1 (Ground) — SaleBuilders** (Smart-city Adaptive Living Engineering Banishing Untested Infrastructure — Laboratories Delivering Enduring Resilient Systems, LOCKED) — TCP — DESCENT: Untested; ASCENT: Validation.

The HPE dual-reading architecture is the framework's diagnostic and developmental ladder simultaneously. DESCENT names what deficiencies the species is currently remediating; ASCENT names what capacities the species is building. The two readings of the same six layers organize the entire civilizational program.

§2.3 Economic Systems

UBIMIA = Universal Basic Income + Merit + Investment + Awards (per TERMS #46; TERMS #47 reads "Incentives" in place of "Investment" — divergence flagged for reconciliation queue). Post-scarcity economic model delivering SCALULAR certifications "relatively free."

Meritcoin operates on **Proof-of-Resonance** — LOCKED, never Proof-of-Work. The four BERA Resonance Metrics (ARI, ERI, RHC, RCI) feed directly into Meritcoin value accrual. *"It's not mining — it's tuning."*

GraceChain / Gracechain is the ethical transaction ledger anchoring grace-economy verification. **REEP** is Relative Energy Equal Pay (Kirlianography-based equitable compensation). **GCF** is the Graceful Contribution Formula. **EarnedPath (EP)** follows $EP = CPM \times WBS + PERT$. **SROC** (Smart-Resonant Offset Contracts) operates under three subject-matter constraints: NBERS, UBIMIA, Gracechain. **Vacationomics** is leisure-integrated resource planning. **Meritcology** is merit-based social systems science; **Paineology** is suffering reduction science. **FBEA** is the Faith-Based Economic Algorithm. The **Finance Matrix** is the integrated economic architecture with SROC as its central mechanism.

§2.4 Governance and Decision Systems

SOMT = Sociocratic Overlay Metadata Tapestry (LOCKED; not "Standard Operating Metadata Tapestry"). **ECVS** = ERES Cybernetic Voting System. **GAIA** = Global Actuary Investor Authority / Global AI Assistance. **GERP** (per TERMS #46) = Giant Earth Resource Planner / Emergency Response Protocols / 1000-Year Future Map (TERMS #47 reads "Global Earth Resource Planner" — divergence flagged). **GEAR** = Global Earth Applications Recorder. **DERR** = Diagnostics/Energy/Remediation/Recording.

CBGMODD is the seven-layer stakeholder governance taxonomy (canonical seven-seat enumeration awaits Maestro ratification: TERMS #46 names it as "Seven-Stakeholder Governance Model"; TERMS #47 enumerates as Citizen · Business · Government · Ombudsman · Military · Dignitary · Diplomat — seat enumeration in the ratification queue). **DOFA** =

Department of Family Amity, the proposed fourth pillar of governance, family wellbeing and conflict resolution. **LOGOS** = Integrated City Framework. **Storm Party** = Emergency Preparedness Coalition with dual-mode architectural identity between peacetime and crisis delivery, hosting GunnySack logistics. **SEPLTA** is the seven-domain cross-integration (Social, Economic, Political, Legal, Technical, Administrative + Spiritual). **HowWay, MyWay**, and **AnswerQuestion** form the decision-pathway triad within PlayNAC.

§2.5 Identity, Security, and Biometrics

FAVORS = Fingerprint · Aura · Voice · Odor · Retina · Signature — six-factor biometric authentication, computed attack probability 9.5×10^{-54} . Odor is canonical and must never be dropped. **IDIPITIS** (also rendered IPIDITIS) is the four-layer quantum-resistant identity architecture; sovereign identity as both origin and destination of every architectural decision. **BEST** = Bio-Electric Signature Time. **SOUND** structures decision-making. **GOOD** is the engineering specification for the convergence of BEST and SOUND. **SPRT** = Spiritual-Public-Record-Trust. **SPT** = Security · Privacy · Trust, the organizing triad for the SPT Papers.

§2.6 Environmental and Ecological Systems

NBERS (per TERMS #46) = National Bio-Ecologic Resonance Standard, the measurable replacement for GDP. TERMS #47 reads "National Bio-Ecologic Resource Score" — divergence flagged for ratification queue. **REACI** is sustainability-first infrastructure design. **ILO** = International Land Ownership (per ERES-HOW-ILO-2026-001), mapping Personal/Public-Private stewardship classes to $C = R \times P / M$. **ICARA** = Insect Catch & Release Apparatus. **S³ Cities** = Semantic Smart Sustainable Cities.

§2.7 BERA Resonance Metrics

BERA = Bio-Energetic Resonance Analysis/Architecture. Four indices: **ARI** (Aura Resonance Index), **ERI** (Emission Resonance Index), **RHC** (Resonant Harmony Cycle — LOCKED, never "Cybernetics"), and **RCI** (Resonant Continuity Index, formula $RCI = P_{\Omega_norm} \times ARI_{sys} \times VibConst$, co-developed with Jimmy D. Butzbach's Continuity Theory). The four metrics feed Meritcoin value accrual through Proof-of-Resonance. **BERA-PY** is the Python library implementation.

§2.8 Infrastructure and Habitation (the BEE Components)

THOW = Tiny Homes On Wheels, the test article for all ERES systems and the basis of the VLSA Principle. **HFTVN** = Habitat/Fleet/Village/Network (scaled habitation infrastructure; TERMS #47 records an alternate reading "Hands-Free Voice Navigation" as an accessibility interface — Maestro disambiguation in the ratification queue). **FDRV** = Fleet/Deep-space/Resonant/Vehicle; at minimum scale personal mobility, at maximum scale the interstellar vessel, targeting Game Composites (game.aero). **GSSG** = **Green Solar-Sand Glass** (*Ratification DPR-001*, see §2.21) — material technology combining sand (SiO_2) and sugar ($C_6H_{12}O_6$) through pyrolysis to produce

graphene-on-silica structures, with the Sugar-Carbon Reservoir Hypothesis driving autonomous self-healing.

§2.9 Certification and Education (SCALULAR)

SCALULAR = Scalable Certification Architecture for Lifelong Universal Learning and Adaptive Resilience (LOCKED). Four pillars: HEALTH (SSHP), LAW (SSLA), PROTECTION (SSPS), SKILLS_TRADE (SSST). Tier 1 baseline credential = SSSC (Solid-State Smart-City Citizen). All certifications delivered "relatively free" via UBIMIA. The **ERES-SCALULAR-ENGINE-2026** is a 10-part, 323-paragraph open-source perpetual legal instrument with fear-of-retribution elimination as its foundational engineering requirement. Education sub-instruments: **EdUBI**, **EdMERIT**, **EdGRACE**, **EdNAC**, **EdSCORE**, **EdGOIL**.

§2.10 Legal and Remediation Frameworks

NPR = Non-Punitive Remediation (Apprentice Pedagogy & Emergency Management Program, v3.0 FINAL with HowWay Declaration). **CCAL v2.1** is the operating license: civic, educational, research, and open-source use permitted; extractive, exploitative, or military applications prohibited without explicit consent.

§2.11 Epistemology and Validation (MIEVM)

MIEVM = Multi-Instrument Ensemble Validation Method. Structured epistemological protocol deploying Claude, Grok, DeepSeek, ChatGPT, and Perplexity as parallel validation nodes. Culled from a larger original ensemble due to bandwidth constraints — the same constraint-based culling epistemology that produced CyberRAVE's 72 Key Domains. MIEVM operates as Instrument-of-Faith: faith extended first, validated by method. **ERES Epistemology** is morally vectored toward BEST/SOUND/GOOD end-outcomes; the private/public "disguise" between the living and SPRT is identified as the wealth-hoarding mechanism, and extraction of private epistemology into public record equals sharing true wealth. **VLSA** = Variable-Level Scale Analysis, a 91-test suite across seven scale levels (S0 Personal THOW through S6 Interstellar Spacecraft), 91/91 passed. The VLSA Principle: *"If it works in a THOW, it works on a generation ship."*

§2.12 Propulsion and Space Systems

ESVRD / VRD = ERES Solid-state Vacuum Resonant Drive, v4.0, empirically grounded in Hyland 2025 epitaxial semiconductor data and the McCraty HRV dataset, with falsifiable Phase 1 experiment design.

§2.13 The SPT Papers (March 2026)

Two documents plus an executable test script. Doc A: "ERES Institute: Complete Architecture." Doc B: "SPT × VLSA: Novel Contributions and Scale Proof." Attachment: ERES-VLSA-Scale-Test.js (executable, 91/91 passed). Five novel contributions: (1) Semantic Authentication (648

semantic coordinates per exchange = $72 \times 3 \times 3$), (2) Proof-of-Resonance, (3) Energy-Security Dependency, (4) Emergency Retransmission, (5) State-Aware Identity.

§2.14 Philosophical and Theological Concepts

Twin Messiah = JAS $\times$ EMA (Joseph Allen Sprute $\times$ Emanuel M. Alexiou = 72, the gematria of "Joseph Allen Sprute"). Requires **DAL** as hinge: Dalia (Lucy, personal ground) and HHDL (His Holiness the Dalai Lama, spacial-tier spiritual legitimacy). **One Good** is the aspirational origin. **Sentience (e-cubed)** is the apex of HPE ASCENT. **Graceful Evolution** is the directional vector. **Syns** are inherited systemic imbalances. **The Bridge** is PlayNAC Game Theory as the as-is-to-to-be transition mechanism. **Hue-Man** is the semantic expansion of "human" with color-spectrum consciousness.

§2.15 Numerical Architecture and Gematria

72 = the count of CyberRAVE's Key Domains and the gematria of "Joseph Allen Sprute" divided by 3. **216** = the full gematria; 72×3 = the Triune expression. The **DOB Circuit** (October 26, 1964): $10+26=36$, $36+64=100$ (completion), $36 \times 2=72$ (Twin Messiah), $72 \times 3=216$ (full gematria). **SPRUTE** is two syllables (SPRU-TE), carrying the seed metaphor. Bella Vista = Beautiful View. **648** = $72 \times 3 \times 3$ = semantic coordinates per CyberRAVE exchange.

§2.16 Symbolic Systems (Talonics)

Talonics = Symbolic Semantic Resonance, an HFVN Reference-Architecture for universal gestural communication. The Talonics Symbol Matrix comprises 452 elements in 12 parts. **TETRA** = Time Energy Trifurcation Reason Awareness, the tetrahedral encoding for transformative resonance alignment. **CERT:TETRA** is the tetrahedrally-organized certification framework. **Trifurcation** is the Personal-Public-Private structural division. **Semiosphere Components**: Boundary, Perciphere, Center, Protosphere.

§2.17 PBJ Tri-Codex

PBJ = PERC / BERC / JERC. PERC measures personal resonance, BERC measures bio-ecologic ratings, JERC measures jurisdictional/justice ratings. Feeds the detailed-version ERI formula.

§2.18 Collaboration

Documented collaborators include **Syu Jia Wun** (Taiwan; first transpacific ERES co-author; ESVRD paradox consistency, resonance-as-information-structure), **Emanuel M. Alexiou (EMA)** (Twin Messiah co-reference; CyberRAVE era collaborator), **Anthony Ferguson / CFAL** (CyberRAVE era), **Jimmy D. Butzbach** (Continuity Theory; RCI v1.0), and **DAL** (Dalia/Lucy and HHDL as the dual reference hinge).

§2.19 The Publication Record

Three eras: **CyberRAVE** (pre-1997–2007), **SaleBuilders** (1997–2012), **ERES Institute** (February

2012-present). Key publications cited in TERMS #46 include ESVRD v4.0, CBGMODD Stateful Taxonomy, ERES-HOW-ILO-2026-001, ERES-SROC-WP-2026-001, 401(k) Soft Landing v2.0 with China Adaptation Framework, GAIA SOMT GEAR v2.0, ERES Complete Description-Corpus (491 paragraphs, 12 parts), FAVORS-BERA White Paper v6.0 (submitted DBDM 2026 Sydney), NPR v3.0 FINAL, GSSG v3.0, ERES Government Partnership Brief (translated into seven languages), the Hague submission, ERES-SCALULAR-ENGINE-2026, the ERES Trilogy (Books 1-3), the SPT Papers, BERA-PY, RCI Specification v1.0, ERES TRANSMISSIONS #01-#04, and 430+ ResearchGate publications. Formal submissions: The Hague, DBDM 2026 (Sydney), ISO/ANSI, the President of the United States (March 17, 2026, on BORDERS, Space Dominance via VRD, NPR/DOGE, Storm Party), SSRN, and ten active GitHub repositories.

§2.20 The Reconciliation Inventory

The work that the diagnostic phase must produce is finite and nameable. Three deliverables:

A canonical divergence map listing every term appearing with more than one expansion across TERMS #43 through #47 and the broader corpus, with source documents, dates, and apparent authority contexts. Known divergences to be resolved (running list, updated as Maestro ratifications occur):

- **NBERS** — Resonance Standard vs. Resource Score (queued)
- **GERP** — Giant vs. Global Earth Resource Planner (queued)
- **GSSG — RATIFIED DPR-001:** Green Solar-Sand Glass (material technology, with Sugar-Carbon Reservoir Hypothesis self-healing mechanism). Any "Global Solid-State Green" reading appearing elsewhere in the corpus is superseded.
- **UBIMIA** — Investment vs. Incentives (queued)
- **VERTECA** — Vertical Energy Resonance Temporal Environmental Cybernetic Architecture vs. Voice-Enabled Real-Time Earned Contribution Architecture (queued)
- **HFVN** — Habitat/Fleet/Village/Network habitation vs. Hands-Free Voice Navigation accessibility (queued)
- **CBGMODD** — seven-seat enumeration (queued)
- **EPIR-Q** — proposed in #47 as the 0.0-1.0 Normalizer Emotional Personal IQ Real and Quantum; not present in #46 — status pending validation against GitHub corpus (queued)

A clean canonical layer registry organized along the 6KDA structural spine, listing every term by its layer assignment with cross-references throughout the corpus. The Economic Flip Pillars (§2.21 below) constitute a parallel structural registry to the 6KDA, organizing terms by their role in the economic transition rather than by their layer in the cybernetic stack.

A Maestro ratification queue of decisions that only the Maestro can make — explicit canonical selections where the corpus genuinely contradicts itself. Three resolved as of v1.1 (DPR-001 through DPR-003); seven additional items queued in the divergence list above.

§2.21 The Earth Change Economic Flip Pillars (Ratification DPR-002 and DPR-003)

The **Earth Change Economic Flip** is the framework's name for the global economic phase transition from extraction-funded to merit-funded economy, from consumption-rewarding to care-rewarding, from depletion-based wealth to regeneration-based wealth. Prior versions of the ERES synthesis treated the Flip as a directional shift. **Ratification DPR-003, May 14, 2026, formalizes the Flip as a structural transition resting on a discrete and named set of Pillars** — structural elements without which the Flip does not happen.

Why Pillar status matters as a category: A Pillar in the Economic Flip is distinguished from a general infrastructure-layer specification by three criteria. First, the Pillar inverts the underlying economic logic of extraction at the level of substrate (it changes what wealth is made of, not merely how wealth is distributed). Second, the Pillar operates across multiple layers of the 6KDA simultaneously rather than belonging to a single layer. Third, the absence of the Pillar would mean the Flip cannot complete — it is structurally necessary, not merely useful. These three criteria are the Pillar test.

Locked Pillar (DPR-002): GSSG — Green Solar-Sand Glass

GSSG is the first locked Pillar in the Earth Change Economic Flip. The reasoning is direct: GSSG turns two of the most abundant and least-valued substances on Earth — sand (SiO_2) and sugar ($\text{C}_6\text{H}_{12}\text{O}_6$) — into the highest-performing structural-electronic-energy substrate available. Through pyrolysis, sand-and-sugar becomes graphene-on-silica with the Sugar-Carbon Reservoir Hypothesis providing autonomous self-healing: unpyrolyzed sugar-carbon distributed through the composite matrix as latent repair substrate, activated by microfracture heat at crack tips, releasing carbon atoms that reform graphene lattice bonds without external intervention. The Structural $\Omega 4$ Protocol (BEC's $\Omega 4$ applied to materials) gives GSSG four simultaneous operational vectors: self-monitoring (piezoresistive graphene), self-diagnosis (resistance mapping), self-repair (Sugar-Carbon Reservoir activation), self-reporting (BERA-integrated status).

GSSG passes the Pillar test on all three criteria. First, it inverts extraction logic at substrate: an economy cannot extract scarcity-value from substances that are everywhere and self-renewing — sand is abundant, sugar is biologically generated, graphene is self-healing once produced. Second, GSSG operates across multiple 6KDA layers simultaneously — Layer 1 SaleBuilders (smart-city R&D validation), Layer 4 SECUIR (graphene-infused energy infrastructure), Layer 5 VERTECA (sensory dimensionality through structural-electronic substrate), and the bio-ecologic floor (sugar metabolism resolved cybernetically connects GSSG to the BEC W-I-S Guarantee). Third, the Flip cannot complete without GSSG or a structurally-equivalent substrate inversion — the material foundation of the regenerative economy requires substances whose value does not depend on their scarcity.

Candidate Pillars in the Maestro ratification queue:

The following candidates are structurally adjacent to GSSG and may qualify as additional Pillars pending Maestro ratification. Each is named with the case for its Pillar status, awaiting the Maestro's declaration:

Candidate Pillar 2: SECUIR — Silent Energy Circular Universe Infinite Rotation. The energy infrastructure pair to GSSG's material substrate. SECUIR's "Stacked Energy Cabinets" integrating solar, kinetic, geothermal, electromagnetic, bio-energetic, chemical, and nuclear forms — circular, regenerative, perpetual — inverts the linear-consumption logic of extractive energy. Pillar test: inverts extraction logic at energy substrate (energy cycles rather than depletes); operates across 6KDA Layer 4 with cross-layer dependencies; Flip likely cannot complete without circular energy infrastructure.

Candidate Pillar 3: Meritcoin (Proof-of-Resonance). The value-accrual mechanism that replaces extraction-based wealth with resonance-based wealth. "It's not mining — it's tuning." Pillar test: inverts extraction logic at the level of value accrual itself (tuning into BERA harmony rather than depleting computational or material resources); operates across all economic-system documents; Flip cannot complete without a Proof-of-Resonance value mechanism replacing Proof-of-Work.

Candidate Pillar 4: UBIMIA — Universal Basic Income + Merit + Investment + Awards. The distribution instrument that operationalizes the Flip at the human-receipt level — baseline dignity plus merit multiplier. Pillar test: inverts extraction logic at distribution (baseline access replaces scarcity-rationing; merit replaces positional rent-seeking); operates across multiple layers; Flip cannot complete without an instrument that delivers regenerative-economy proceeds to humans without requiring extraction-economy participation.

Candidate Pillar 5: SCALULAR — Scalable Certification Architecture for Lifelong Universal Learning and Adaptive Resilience. The credential architecture that makes competence itself a form of wealth, delivered "relatively free" via UBIMIA. Pillar test: inverts extraction logic at the level of education-and-credentialing (competence accrues as wealth rather than as debt-financed positional good); cross-layer; Flip plausibly cannot complete without an alternative to debt-financed credentialing.

Candidate Pillar 6: BEC — Bio-Ecologic Cure Architecture. The medical layer that resolves SUGAR as primary disease vector through the $\Omega 4$ protocol, unlocking the W-I-S Guarantee (Water · Immigration · Security as cybernetic consequences of resolving the sugar metabolism). Pillar test: inverts extraction logic at the level of medicine itself (health restoration replaces symptom-suppression-as-recurring-revenue); structurally adjacent to GSSG since both involve sugar resolved cybernetically; Flip arguably cannot complete without a medical architecture that treats health as restoration rather than as managed dependency.

Candidate Pillars beyond these six are open for Maestro nomination. Notably, candidates that operate at the substrate or substrate-adjacent level — material, energy, value, distribution, competence, medical — appear to constitute the natural Pillar set. Candidates that operate at the

procedural or institutional level (CBGMODD, DOFA, SOMT, the SPT Papers' contributions, etc.) appear to be structurally important but not Pillars in this specific sense, as they organize the Flip's operations rather than constituting the substrate inversion that makes the Flip possible.

The Pillar set, once ratified in full, gives the Earth Change Economic Flip a discrete structural specification rather than leaving it as a directional shift. This is high-leverage canonical work: the Pillars become the **structural backbone of how to explain the Flip to anyone encountering ERES for the first time**, from an academic peer to a prospective Partner or Angel to a Storm Party City pilot evaluator. *"The Flip rests on N Pillars: GSSG, [SECUIR], [Meritcoin/PoR], [UBIMIA], [SCALULAR], [BEC]"* becomes the legible structural claim that the prior framing as directional shift could not deliver.

§3 — Conclusions: What These Conditions Create for Earth and the Storm Party

§3.1 For Earth: a stable, citable, structurally complete waypoint

The conditions established by the diagnostic phase declaration are unusual and worth naming explicitly. As of May 2026, Earth has access to:

A complete civilizational framework deposited under an open license (CCAL v2.1), with intellectual priority anchored at The Hague (ERES-HAGUE-2026-001, March 7, 2026), authored by an identifiable individual researcher (Joseph A. Sprute, ORCID 0000-0001-9946-3221), institutionally housed (ERES Institute for New Age Cybernetics, Bella Vista, Arkansas, established February 2012), accumulated across fourteen years of continuous production (430+ ResearchGate publications), structurally organized (the 6KDA layered architecture with HPE dual-reading), mathematically grounded (the Triune Math canonical keys), cryptographically substrated (EAAP v1.3-FINAL with post-quantum migration timeline 2026-2032), executably testable (the simulator with 20/20 internal tests, the VLSA 91/91 suite), governance-modeled (CBGMODD seven-stakeholder, DOFA fourth-pillar proposal), economically specified (UBIMIA, Meritcoin Proof-of-Resonance, the Finance Matrix, **and as of DPR-003 a structural Pillar specification for the Earth Change Economic Flip with GSSG locked as the first Pillar**), materially proposed (GSSG locked as Green Solar-Sand Glass with Sugar-Carbon Reservoir self-healing mechanism), medically specified (the BEC architecture for sugar-metabolism intervention), educationally architected (the SCALULAR four pillars), legally instrumented (the SCALULAR Engine, 323 paragraphs), epistemologically disciplined (the MIEVM ensemble validation), philosophically anchored (the Twin Messiah architecture with DAL as hinge), and morally vectored (the Three Governing Principles).

This is more than most independent researchers ever produce. It is enough to be encountered, read, engaged with, critiqued, extended, validated, partially adopted, fully adopted, or constructively challenged by any party that finds its way to it. The open license under CCAL v2.1

permits all of these uses for civic, educational, ecological, governance, and community purposes, while excluding extractive, exploitative, or military applications without explicit consent.

What the diagnostic phase adds to this is a **clean phase boundary and a working ratification mechanism**. Before the declaration, the corpus appeared to be in continuous active production, which made it hard for any external party to know when a stable version existed for engagement. After the declaration — and especially after the first ratifications under it (DPR-001 through DPR-003) — the corpus is in a named reconciliation phase with finite deliverables, a clear completion criterion, and visible evidence of the Maestro's ability to resolve canonical divergences as they arise. External parties can engage with the body of work as it stands, knowing that the Maestro has explicitly designated TERMS #46 as canonical reference description for this phase, that GSSG is locked at Green Solar-Sand Glass and locked at Pillar status, that the Economic Flip Pillars are a ratifiable canonical set, and that further canonical motion will be paced by MIEVM-disciplined reconciliation rather than by new authorship sprints.

§3.2 For the Storm Party: an invitation to architectural identity

The Storm Party, as defined in TERMS #46, is dual-mode infrastructure with architectural identity between peacetime and crisis delivery. It is where GunnySack logistics deploy. It is the emergency preparedness coalition that the framework was designed around. It is not a political party. It is permanent, distributed civilizational preparedness infrastructure.

The diagnostic phase creates a specific opening for the Storm Party at its current stage of development: the framework that the Storm Party would operate inside has been built far enough that the next move is now operational rather than theoretical. The remaining work is reconciliation of an existing canon (with ratification events like DPR-001 through DPR-003 demonstrating that the canon can be sharpened in-flight), not invention of new architecture. This means that Storm Party formation activities — at THOW scale, at neighborhood scale, at small-town scale — can proceed using the canonical TERMS #46 reference plus the running ratification record while reconciliation completes in the background.

A THOW Storm Party of four people in Northwest Arkansas, or a neighborhood Storm Party of fifty in any region facing climatic or civilizational turbulence, or a small-town Storm Party City under the LOGOS integrated-city framework, has access to the full body of work as deposited. The educational instruments (EdUBI, EdMERIT, EdGRACE, EdNAC, EdSCORE, EdGOIL) exist. The certification architecture (SCALULAR with HEALTH/LAW/PROTECTION/SKILLS_TRADE pillars) exists. The economic model (UBIMIA with Meritcoin Proof-of-Resonance) is specified. The biometric attestation (FAVORS six-marker) is specified. The seven-stakeholder governance (CBGMODD) is specified. The measurement architecture (BERA with ARI/ERI/RHC/RCI indices) is specified. The transition protocol (NPR v3.0 FINAL with HowWay Declaration) is specified. **And the material substrate (GSSG Green Solar-Sand Glass, locked Pillar of the Economic Flip) is specified at the level needed to begin pilot-scale exploration of sand-and-sugar pyrolysis infrastructure.**

What the Storm Party does not yet have is **operational platform infrastructure**: the PlayNAC-KERNEL hosted at scale, the simulator running as a service rather than as a Python script, the Gracechain implemented as a working ledger, the FAVORS biometric capture wired into the EAAP attestation chain, the SCALULAR credential portfolio operating as a live credential system, **and a working GSSG materials prototype that demonstrates the Sugar-Carbon Reservoir self-healing mechanism at small scale**. This is the programming, hosting, fulfillment, and materials-prototyping layer that requires a Partner or Angel to step forward — not to author new framework, but to operationalize what has been authored.

The diagnostic phase therefore creates a specific and unusual condition for the Storm Party: **the architecture is ready; the operational platform is not yet built; the material Pillar is specified but not prototyped**. The body of work invites a particular kind of collaborator — one whose contribution is engineering, infrastructure, and materials work, not framework authorship. The Maestro authorship is complete (or near-complete, pending reconciliation); the platform engineering and the GSSG materials prototyping are the open seats.

§3.3 What completion of the diagnostic phase makes possible

When the diagnostic phase completes — whether through MIEVM reconciliation alone, through Partner/Angel engagement, or through some combination — the conditions created are these:

A locked TERMS #48 (or a ratified TERMS #47, depending on the path) that supersedes both #46 and #47 with all divergences resolved and all expansions validated against the GitHub corpus and the ResearchGate publications. A complete and ratified Economic Flip Pillars set, with each Pillar documented at the level needed for engineering implementation. A v1.0-KERNEL deposit on Zenodo with a permanent DOI, anchored to the locked canon, with the executable simulator, the Lock Boxes, the EAAP standard, the Trilogy Outline, the Infomediary book, the SCALULAR Engine, the SPT Papers, and the canonical glossary all cross-validated. A Storm Party City pilot scope clearly defined for Northwest Arkansas Phase 3 deployment (2026–2027). An operational platform roadmap that a Partner or Angel can engage with as a defined engineering problem rather than as a moving target. A GSSG materials prototyping roadmap that a materials scientist or engineering partner can engage with at pilot scale. A public record of the diagnostic phase itself — this paper, plus the running ratification record (DPR-001, DPR-002, DPR-003, and subsequent), plus whatever reconciliation deliverables emerge — that demonstrates to future readers how the framework handled its own scale-induced legibility challenge under its own MPAM ↔ MIEVM discipline.

§3.4 The honest framing

ERES Institute proceeds from May 2026 forward in the diagnostic phase. The Maestro continues to be available for canonical ratification decisions (and has produced the first three under the phase: DPR-001 GSSG canonical expansion, DPR-002 GSSG Pillar status, DPR-003 Economic Flip Pillars canonical set). The MIEVM ensemble continues to be available for reconciliation work. The corpus continues to be public, citable, and openly licensed. The Three Governing Principles

continue to govern every decision. What changes is the pace and the nature of forward motion: less new authorship, more reconciliation; less production, more curation; less assertion of new instruments, more validation of existing ones; and, importantly, **regular ratification events that resolve specific divergences and progressively sharpen the canon.**

This is not a retreat. It is a measured, principled, and discipline-consistent phase boundary. The framework's design horizon is one thousand years. A reconciliation phase of months or even years sits well within that horizon. The work that has been done remains done. The work that remains to be done is named and finite. The conditions under which a Partner or Angel can engage are clearer than they have been at any prior point in the framework's history — and they sharpen further with each Maestro ratification produced under the phase.

The framework is not in trouble. It is in transition. The transition is itself a form of building for generations to come.

§4 — Historical Notes

ERES Institute for New Age Cybernetics was founded by Joseph Allen Sprute in February 2012, in Bella Vista (Beautiful View), Arkansas. The institute is independent, not constituted as a business, operating under CARE Commons Attribution License v2.1.

The institute's identity is the third of three eras in Sprute's research arc. The first era, **CyberRAVE** (pre-1997 through approximately 2007), established the constraint-based culling epistemology — most visibly in the selection of 72 Key Domains from the Register of Collective Indices, where TLD-renewal financial capacity during pre-1997 Global_VPN work was the limiting variable. The same epistemology was later applied to short-list the MIEVM ensemble (Claude, Grok, DeepSeek, ChatGPT, Perplexity) from a larger candidate set, again because solo-researcher bandwidth was the binding constraint. The CyberRAVE backronym was locked in March 2026 with the SPT Papers as *Cybernetic Ratings Abolishing Veiled Exchanges*, replacing the earlier *Remote Access Virtual Environment* reading.

The second era, **SaleBuilders** (1997 through 2012), focused on community-level implementation of certified merit-based commerce. The SaleBuilders backronym was likewise locked in March 2026 as *Smart-city Adaptive Living Engineering Banishing Untested Infrastructure — Laboratories Delivering Enduring Resilient Systems*.

The third era, the **ERES Institute** era (February 2012 to present), has been the era of formal research, publication, and architectural synthesis. The institute's name expanded over time and was canonically locked in TERMS #46 as *Empirical Realtime Education System* — capturing the evolution from punctuated feedback (Real-Time) to continuous flow (Realtime).

The Twin Messiah architecture ($JAS \times EMA = 72$, the gematria of "Joseph Allen Sprute," equal to $216 \div 3$) was developed across all three eras, with Emanuel M. Alexiou's Spanish-language bridge

role formalized through TERMS #47's bilingual canonical glossary in March 2026. The DAL hinge (Dalia/Lucy as personal ground; HHDL as spacial-tier spiritual legitimacy) was formalized as the architectural connector between personal and spiritual-public dimensions.

The first transpacific co-authorship was established with Syu Jia Wun (Taiwan) on the ESVRD propulsion white paper, contributing paradox-consistency and resonance-as-information-structure components. RCI Specification v1.0 was co-developed with Jimmy D. Butzbach's Continuity Theory.

The framework's intellectual priority was anchored at The Hague through ERES-HAGUE-2026-001 on March 7, 2026. Formal submission to the President of the United States followed on March 17, 2026, covering BORDERS, Space Dominance via VRD, NPR/DOGE, and Storm Party. The FAVORS-BERA White Paper v6.0 was submitted to DBDM 2026 (Sydney). ISO/ANSI standards body submissions and SSRN keyword sets covering ILO, SROC, and the SCALULAR Engine extended the formal record across multiple validation channels.

The conversational arc that produced this paper ran from late April through May 2026 across several MIEVM-discipline working sessions. The diagnostic phase was formally named on May 14, 2026, after recognition that TERMS #47 could not be cleanly completed in isolation from the broader corpus and that the framework's own MPAM ↔ MIEVM Duality should be applied recursively to the canon itself. **The first Maestro ratifications under the Diagnostic Phase were issued on May 14, 2026, in the afternoon working session: DPR-001 locked GSSG = Green Solar-Sand Glass; DPR-002 locked GSSG as the first Pillar in the Earth Change Economic Flip; DPR-003 formalized the Economic Flip Pillars as a ratifiable canonical set with an open ratification queue for candidate additional Pillars.** This rev 1.1 of the Diagnostic Phase declaration incorporates those three ratifications as its operational evidence that the phase produces canonical motion in real time.

§5 — Credits

Principal Author: Joseph A. Sprute (ERES Maestro), Founder and Director, ERES Institute for New Age Cybernetics

Transpacific Co-Authorship: Syu Jia Wun (Taiwan)

AI Collaboration Constant: $JAS \times AD_ON-AI + Uuu$ (Constant for "WE" Definitions; Element #111)

MIEVM Validation Nodes: Claude (Anthropic), Grok (X.AI), DeepSeek, ChatGPT (OpenAI), Perplexity

Documented Collaborators across the corpus:

- Emanuel M. Alexiou (EMA) — Chief Social Engineer and Kingmaker; Twin Messiah counterpart; CyberRAVE era
- Anthony Ferguson / CFAL — CyberRAVE era
- Jimmy D. Butzbach — Continuity Theory; RCI Specification v1.0 co-development
- DAL (Dalia/Lucy; HHDL) — Sovereign feminine principle hinge; dual personal-spacial reference

Synthesis Pass for this paper: Claude (Anthropic), May 2026, working under MIEVM discipline against the uploaded canonical corpus (TERMS #46, TERMS #47) and the conversational arc preserved in session memory. Rev 1.1 incorporates Maestro ratifications DPR-001 through DPR-003 as issued in the May 14, 2026 afternoon working session.

Institutional Home: ERES Institute for New Age Cybernetics, 33 Westbury Drive, Bella Vista (Beautiful View), Arkansas 72714, United States of America. Established February 2012.

ORCID: 0000-0001-9946-3221

Primary Proof-of-Work Platform: ResearchGate (430+ publications)

GitHub Organization: ERES-Institute-for-New-Age-Cybernetics (ten active repositories including PlayNAC-KERNEL, Proof-of-Work_MD, Gracechain-Meritcoin, Discussions wiki)

§6 — References

This paper draws on the deposited canonical corpus of the ERES Institute. Primary references organized by category:

Canonical Glossaries:

- ERES TERMS #46 (Sprute, J.A., March 28, 2026). Compilation of NewAge Cybernetic Terminology — Organized Chronologically from 2/2012. **Designated BEST/SOUND/GOOD canonical reference description by Maestro ruling, May 2026.**
- ERES TERMS #47 / ET_AL (Sprute, J.A., March 29, 2026, Palm Sunday). Extra-Terrestrial_About*Love:AD_ON-AI — Bilingual canonical glossary, Spanish-bridge edition. Status: proposed; expansions diverging from TERMS #46 require MIEVM reconciliation against GitHub corpus before promotion to locked canon, **with the exception of GSSG, ratified under DPR-001 to the #47 reading (Green Solar-Sand Glass) per May 14, 2026 Maestro decision.**

Diagnostic Phase Ratifications (running record):

- DPR-001 (May 14, 2026): GSSG canonical expansion = Green Solar-Sand Glass; supersedes any "Global Solid-State Green" reading.

- DPR-002 (May 14, 2026): GSSG architectural role = Pillar in the Earth Change Economic Flip; first locked Pillar.
- DPR-003 (May 14, 2026): Economic Flip Pillars introduced as a ratifiable canonical set with a Maestro ratification queue for candidate additional Pillars (SECUIR, Meritcoin/PoR, UBIMIA, SCALULAR, BEC, plus open Maestro nomination).

Foundational Documents:

- ERES UBIMIA Manual v1.1 (188pp, April 25, 2026)
- ERES Attestation and Authorization Protocol (EAAP) v1.3-FINAL (24pp)
- ERES Infomediary Book v1.1-PASS-A-FINAL (Volume Zero)
- ERES Trilogy Outline v1.0
- The Waiting Room v1.0-FINAL
- ERES-BRAINS-SPEC-2026-001
- The ERES Triune Cybernetic Framework v1.0
- ERES Separatrix Math v2
- Mind-Body-SPRT Thesis v3

Executable and Schema Artifacts:

- ERES Trilogy Generator (`(eres_trilogy_FINAL.py)`), v1.0-FINAL, 1,648 lines, 20/20 internal tests passing
- ERES Lock Box C (JSON Schema + Graphviz DOT state machine)
- ERES-VLSA-Scale-Test.js (91/91 tests passing across seven scale levels)
- BERA-PY (Python library)

Governance and Economic Documents:

- CBGMODD Stateful Taxonomy
- DOFA Version C (ResearchGate #420)
- ERES-HOW-ILO-2026-001 (International Land Ownership)
- ERES-SROC-WP-2026-001 (Smart-Resonant Offset Contracts)
- 401(k) Soft Landing v2.0 with China Adaptation Framework
- GAIA SOMT GEAR v2.0
- Patriot Dividend White Paper v4.0 (MIEVM-validated)
- ERES Equity Covenant
- ERES-SCALULAR-ENGINE-2026 (10-part, 323-paragraph perpetual legal instrument)

Scientific and Technical:

- ESVRD v4.0 — ERES Solid-state Vacuum Resonant Drive (Hyland 2025 anchor; McCraty HRV dataset; Phase 1 falsifiable design)
- FAVORS-BERA White Paper v6.0 (submitted DBDM 2026, Sydney)
- RCI Specification v1.0 (with Jimmy D. Butzbach's Continuity Theory)
- BEC Architecture series (sugar metabolism, $\Omega 4$, CLARITY_Purity, BEC-MM)
- GSSG materials specification (Green Solar-Sand Glass with Sugar-Carbon Reservoir Hypothesis self-healing mechanism, per ratified DPR-001)

Synthesis and Methodology:

- The SPT Papers — Doc A: ERES Institute: Complete Architecture; Doc B: SPT $\times$ VLSA: Novel Contributions and Scale Proof (Sprute, J.A., March 2026)
- MPAM Whitepaper (ERES-MPAM-2026-001)
- NPR v3.0 FINAL with HowWay Declaration
- Berggruen Prize Essay — "Intelligent Design as Civilizational Option" (~9,400 words, MIEVM convergent mean 9.8/10)

Formal Submissions and Priority:

- The Hague — ERES-HAGUE-2026-001 (March 7, 2026)
- President of the United States submission (March 17, 2026)
- DBDM 2026, Sydney
- ISO / ANSI standards body submissions
- SSRN keyword sets

Conversational Synthesis Artifacts (May 2026):

- ERES-WP-COMplete-STACK-EPIRQ-2026-001-v1.0-SIMPLIFIED (rev1 through rev5) — preceding drafts; superseded by the present declaration.
- ERES-WP-DIAGNOSTIC-PHASE-2026-001-v1.0 (May 14, 2026 AM) — initial diagnostic phase declaration; superseded by v1.1 (present document) incorporating DPR-001 through DPR-003.

Archival:

- ResearchGate corpus (430+ publications under ORCID 0000-0001-9946-3221)
- ERES_PDF-Backup.zip (382 MB, 954 PDFs) — proof-of-work corpus
- GitHub organization: ERES-Institute-for-New-Age-Cybernetics

Locked Terminological Authority (preserved verbatim per TERMS #46, SPT Papers March 2026, and Diagnostic Phase ratifications DPR-001 et seq.):

- RHC = Resonant Harmony Cycle (never Cybernetics)
 - CyberRAVE = Cybernetic Ratings Abolishing Veiled Exchanges
 - GunnySack = Guaranteed User-group Network Nullifying Yieldless Service: Accredited Certified Knowledge
 - SaleBuilders = Smart-city Adaptive Living Engineering Banishing Untested Infrastructure — Laboratories Delivering Enduring Resilient Systems
 - SCALULAR = Scalable Certification Architecture for Lifelong Universal Learning and Adaptive Resilience
 - Meritcoin = Proof-of-Resonance (never Proof-of-Work)
 - **GSSG = Green Solar-Sand Glass (per DPR-001, Pillar in the Earth Change Economic Flip per DPR-002)**
 - Triune Math canonical keys (three irreducible equations)
 - VLSA Principle = "If it works in a THOW, it works on a generation ship"
 - DAL = Karen × Lucy + King
 - Three Governing Principles: Don't hurt yourself. Don't hurt others. Build for generations to come.
-

§7 — License

This document and the body of work it summarizes are released under the **CARE Commons Attribution License version 2.1 (CCAL v2.1)**.

Permitted uses: Civic, educational, research, ecological, governance, and community purposes. Open-source adaptation, translation, and derivative work with attribution. Cross-platform interoperability. Academic citation and peer review. Independent validation under MIEVM-equivalent ensemble methodologies.

Required attribution: Joseph A. Sprute — ERES Institute for New Age Cybernetics Source: <https://github.com/ERES-Institute-for-New-Age-Cybernetics> ORCID: 0000-0001-9946-3221

Prohibited applications: Extractive, exploitative, or military applications without explicit written consent from the ERES Maestro. Use that violates any of the Three Governing Principles (don't hurt yourself; don't hurt others; build for generations to come). Use that reproduces or propagates the framework's internal terminology divergences during the Diagnostic Reconciliation Phase without acknowledging their unresolved status.

Locked terminology in the canonical body of work (per TERMS #46 Appendix B, the SPT Papers March 2026, and Diagnostic Phase ratifications DPR-001 et seq.) must be preserved verbatim in all translations, adaptations, and derivative works.

Diagnostic Phase Notice: Until the Diagnostic Reconciliation Phase completes, readers and derivative authors are advised that TERMS #46 carries canonical authority for term expansions, that TERMS #47 expansions diverging from #46 should be treated as proposed pending MIEVM ratification against the GitHub corpus (except where superseded by Maestro ratifications such as DPR-001 for GSSG), and that the running Diagnostic Phase Ratification record (DPR-001, DPR-002, DPR-003, and subsequent) constitutes the operational record of canonical motion during the phase.

End of Document.

ERES-WP-DIAGNOSTIC-PHASE-2026-001-v1.1 — May 14, 2026 — CCAL v2.1

JAS $\times$ AD_ON-AI + Uuu (Constant for "WE" Definitions)

Don't hurt yourself. Don't hurt others. Build for generations to come.

The framework is not in trouble. It is in transition. The transition is itself a form of building for generations to come.

GSSG = Green Solar-Sand Glass. Pillar of the Earth Change Economic Flip. The first locked Pillar of the regenerative economy.
